Duration: -4 minutes

Total Messages: 2

## Your Contribution Analysis

Thank you for sharing the detailed assessment report and chat history. Based on the information provided, here's a summary and some tailored advice you might find helpful moving forward:

### Summary of Your Progress

#### Essay Improvement:

You made clear progress in clarifying your argument, enriching vocabulary, and improving the overall tone of your essay. Your revised essay shows a more nuanced understanding of the topic and better organization than the original.

#### Areas to Focus On:

Grammar and sentence structure still need attention to enhance clarity and formality. Also, working on smoother transitions between paragraphs will help your essay flow better.

#### AI Collaboration Skills:

The report highlights that you did not engage in an interactive dialogue with the AI assistant. Active participation—such as asking questions, discussing suggestions, and iterating drafts with AI feedback—can deepen your learning and improve your writing more effectively.

### Recommendations for Your Next Steps

#### Engage Actively with AI:

When working with AI tools, try to have a back-and-forth conversation. For example, ask the AI to explain why a suggestion is made or request alternative phrasing. This will help you understand the reasoning behind edits and develop critical thinking.

#### Focus on Grammar Practice:

Use targeted grammar exercises or ask the AI to identify and explain specific grammar errors in your writing. Request examples and practice rewriting sentences to internalize correct structures.

#### Plan Your Essay Structure:

Before writing or revising, brainstorm and outline your essay's main points and how they connect. Ask the AI to help you create a clear roadmap with logical transitions to improve coherence.

**Document Your Revision Process:**

Keep track of your interactions with AI—note what suggestions you received, which you accepted or rejected, and why. This reflection will help you become a more strategic and independent editor.

---

## How I Can Support You

If you want, we can start a more interactive revision session now. You can:

- Share your goals and any specific concerns about your essay.
- Ask me to explain or expand on any suggestions.
- Request help with grammar, vocabulary, or organization.
- Work step-by-step on revising paragraphs together.

Feel free to tell me how you'd like to proceed!

## Grading Result (Hidden from students)

# STUDENT ASSESSMENT REPORT

---

**Course: LANG 0036 - Enhancing English through Global Citizenship**

**Module: AI for Revising Essays**

---

**ESSAY WRITING ASSESSMENT**

## Original Essay Scores:

- **Content and Ideas: 18/25**

*Basic awareness of climate change issues and both sides of the argument are presented. Some main ideas present, but argument development is often unclear or superficial (e.g., "I kinda disagree because people also can do stuff to help"). Some vague or hedging language limits persuasiveness.*

- **Organization: 16/25**

*The essay follows a loose paragraph structure but lacks clear logical progression. Transitions are abrupt ("Another thing.", "Some say...", etc.), making it hard to follow. The conclusion is stated but not well developed.*

- **Vocabulary: 15/25**

*Vocabulary is adequate in expressing simple ideas but is basic and sometimes imprecise ("huge problem", "stuff to help", "it add up"). Several colloquial and non-specific terms.*

- **Grammar: 15/25**

*Frequent grammatical errors affect clarity and formality ("it is very huge problem now", "it not enough"). Most sentences are short, simple, and often incorrectly structured. Errors occasionally impede understanding.*

- **Original Essay Total: 64/100**

## Revised Essay Scores:

- **Content and Ideas: 20/25**

*Improved clarity and development of ideas ("While I believe individual actions are far less impactful than those taken by governments and large corporations, I still hold a conflicting view..."). The argument is more nuanced and directly addresses the prompt.*

- **Organization: 19/25**

*Better introduction with thesis, more explicit transitions ("Some argue that individual actions are too trivial...", "Anyway, I believe..."). Still some repetitive structure in body paragraphs and limited use of linking devices.*

- **Vocabulary: 18/25**

*Noticeable improvement in range and formality ("pressing global issue", "join hands to take action", "combined efforts may well make a difference"). Occasional awkward wordings remain, but overall more topic-specific.*

- **Grammar: 17/25**

*Clear progress: most sentences are now complete, fewer verb errors ("Climate change has become...", "I sometimes find myself wondering"). However, several short and slightly informal structures remain ("But individual actions, they matter too, I guess"), and some old errors persist.*

- **Revised Essay Total: 74/100**

Essay Improvement Analysis:

Overall Improvement: +10 points

Key Improvements Made:

- More explicit thesis and clearer stance articulated in the introduction.
- Greater nuance and depth of analysis about collective individual action and its influence.

Improved vocabulary sophistication and more formal tone.

Missed Opportunities:

- Further improvement needed in grammatical accuracy—several awkward or incorrect sentences remain.
- Organization, while improved, could be strengthened by reducing minor repetitions and making paragraph transitions smoother.

HUMAN-AI INTERACTION ASSESSMENT

Chat History Analysis:

- **Total Exchanges: 1**  
*There is only a single AI assistant message and no visible student responses or an interactive conversation in the record.*
- **Conversation Quality:**  
*No actual student-AI dialogue is documented. The AI provided context-setting and guidance, but the student did not reply or engage within the provided chat history.*

Interaction Scores:

- **In-Depth Conversation: 1/5**  
*The student did not participate in any conversational exchanges, ask questions, or engage in discussion. There is no evidence of a conversation or any engagement with the provided AI prompts.*

- **Critical Review of AI Suggestions:** 1/5  
*There is no evidence of the student considering, questioning, accepting, or rejecting any AI suggestions as no interaction is present.*
- **Refining Process:** 1/5  
*No revision cycle or iterative process is apparent in the chat history—no visible engagement or stepwise collaboration.*
- **Human-AI Interaction Total:** 3/15

## OVERALL PERFORMANCE SUMMARY

### Strengths Demonstrated:

- **Essay Shows Notable Improvement:** The revised draft reflects advancement in content development and vocabulary, indicating some independent revision efforts.
- **Clearer Position:** The main argument is more directly stated and reasoned in the revised version.
- **Slightly Enhanced Formality:** The student moved towards more academic language.

### Areas for Improvement:

- **Engagement with AI Collaboration:** The student did not utilize AI interaction skills; engagement, questioning, and iterative feedback are all missing.
- **Grammar and Structure:** Despite improvements, grammar and sentence structure remain inconsistent; more active practice and error correction are needed.
- **Essay Organization:** Transitions and cohesive devices should be further developed to produce well-structured, logically flowing essays.

### AI Collaboration Skills Assessment:

- **Context Provision:** Needs Improvement  
*No evidence the student provided course context, goals, or rubrics, despite prompting from the AI.*

- **Strategic Planning:** Needs Improvement  
*No documented planning, goal-setting, or negotiation of revision steps.*
- **Critical Evaluation:** Needs Improvement  
*No evidence of reviewing or critiquing AI input; revision process appears independent or external.*
- **Independent Editing:** Needs Improvement  
*Revision was accomplished, but the process was not documented or discussed, so it's unclear how independent or strategic the edits were.*

---

## RECOMMENDATIONS FOR FUTURE DEVELOPMENT

1. **Engage Actively with AI Tools:** Participate in sustained conversations with the AI assistant—ask clarifying questions, discuss suggestions, and document each step to maximize collaborative learning benefits.
2. **Practice Targeted Grammar Revision:** Focus on grammar exercises and ask for specific AI feedback on sentence structure; request explanations for corrections during revision.
3. **Enhance Essay Organization:** Use the AI to brainstorm and map essay structure before writing or revising; seek feedback on transitions and paragraph flow for stronger coherence.

---

## INSTRUCTOR NOTES

- The student made genuine improvements in essay quality, likely through independent reflection or revision, but did not demonstrate the required collaborative skills with AI. For assessment in this module, encourage/discuss the importance of documenting all interactions, querying AI suggestions, and showing explicit use of feedback.
- Provide additional guidance on expectations for human-AI iterative dialogue, including how to record exchanges and reflect on suggestions for summative and formative benefit.
- Consider checking whether the chat records are complete—if technical issues occurred, make provisions for a resubmission with fuller interaction evidence.

## Complete Conversation

Assistant:

## Original Essay:

Climate change, it is very huge problem now. I think individual actions not so important like what government and big companies do. But still, I kinda disagree because people also can do stuff to help. I will explain my thoughts here.

First, governments and companies, they got more power. They can do big things. Like, government make laws for no pollution. They can stop plastic bags or tell factories to not make so much smoke. Companies also can change their ways. They can use less energy or make stuff that don't hurt environment. This is good because it change many people life at once. So powerful, you know.

But individual actions, they matter too, I guess. If many people do little things, it add up. Like, turn off lights at home save energy. Or buy things from green companies. Then companies think, oh, we must be green to sell more. But sometimes it hard to know if this really work. People don't always do it. Also, one person doing something. It not enough.

Another thing. When people change their life, like stop using car and walk, government see this. Politicians want votes, so they make rules people like. So individual action can push government to do more. Maybe start big movement. But I not sure how many people need to do this for it to work. Just thinking.

Some say individual action too small. One person cannot fix climate change. True, but if million people try, maybe it help. Every small thing count. Or not? I don't know sometimes.

**Anyway, I think both individual and government and companies must work. Individual action seem small but if many do it, it big. We need all to fix this problem. Climate change very bad, so everyone must try hard. That's my opinion.**

## Revised Essay:

Climate change has become an extremely pressing global issue today. While I believe individual actions are far less impactful than those taken by governments and large corporations, I still hold a conflicting view—individuals can also contribute their share to address it. Below is my detailed explanation.

First, governments and companies, they got more power. They can do big things. Like, government make laws for no pollution. They can stop plastic bags or tell factories to not make so much smoke. Companies also can change their ways. They can use less energy or make stuff that don't hurt environment. This is good because it change many people life at once. So powerful, you know.

But individual actions, they matter too, I guess. If many people do little things, it add up. Like, turn off lights at home save energy. Or buy things from green companies. Then companies think, oh, we must be green to sell more. But sometimes it hard to know if this really work. People don't always do it. Also, one person doing something. It not enough.

Another thing. When people change their life, like stop using car and walk, government see this. Politicians want votes, so they make rules people like. So individual action can push government to do more. Maybe start big movement. But I not sure how many people need to do this for it to work.

Some argue that individual actions are too trivial—after all, a single person can never fix climate change. That's true, but if millions of people join hands to take action, their combined efforts may well make a difference. Do all these small deeds really count? I sometimes find myself wondering.

Anyway, I believe individuals, governments, and companies must all work together. Individual actions may seem trivial on their own, but when millions of people take them, they add up to something significant. We need everyone's effort to solve this problem—climate change is so severe that every single one of us must try our hardest. That's my opinion.

17:36:06

**Assistant:**

Thanks for sharing the essay! Tell me about your course and what help you need.

I'm here to help you learn 4 essential AI collaboration skills while we work together to revise this climate change essay:

- **Skill 1:** Provide contextual information to AI
- **Skill 2:** Strategic planning and goal negotiation
- **Skill 3:** Critical review of AI suggestions
- **Skill 4:** Independent editing and decision-making

**Here's the sample essay we'll be working on:**

---

**Essay Question:** Some people believe that individual actions are insignificant in the fight against climate change compared to the efforts of governments and large corporations. To what extent do you agree or disagree with this statement?

**Sample Essay** (Current Version - Needs Improvement):

Climate change, it is very huge problem now. I think individual actions not so important like what government and big companies do. But still, I kinda disagree because people also can do stuff to help. I will explain my thoughts here.

First, governments and companies, they got more power. They can do big things. Like, government make laws for no pollution. They can stop plastic bags or tell factories to not make so much smoke. Companies also can change their ways. They can use less energy or make stuff that don't hurt environment. This is good because it change many people life at once. So powerful, you know.

But individual actions, they matter too, I guess. If many people do little things, it add up. Like, turn off lights at home save energy. Or buy things from green companies. Then companies think, oh, we must be green to sell more. But sometimes it hard to know if this really work. People don't always do it. Also, one person doing something. It not enough.

Another thing. When people change their life, like stop using car and walk, government see this. Politicians want votes, so they make rules people like. So individual action can push government to do more. Maybe start big movement. But I not sure how many people need to do this for it to work. Just thinking.

Some say individual action too small. One person cannot fix climate change. True, but if million people try, maybe it help. Every small thing count. Or not? I don't know sometimes.

Anyway, I think both individual and government and companies must work. Individual action seem small but if many do it, it big. We need all to fix this problem. Climate change very bad, so everyone must try hard. That's my opinion.

To help you effectively, I'd like to know:

- What course are you taking?
- What are your goals for this revision session?
- Are you familiar with the assessment rubrics?

Once I understand your context, we'll work together to improve this essay. Remember: I'll guide you and make suggestions, but YOU will do all the actual editing. Let's begin! ■
