Course Information and Student Background

Course Information: Course: LANG 0036 - English for Academic Purposes Level: Intermediate to Advanced Focus: Academic writing and critical thinking Assessment: Essay writing with rubric-based evaluation

Student Background: Academic Level: University student Language: English as additional language Goals: Improve academic writing skills Challenges: Structure, vocabulary, critical analysis

Rubric:

Assessment Task: Writing (20%) Part 1: Point-of-view Essay (10%)

Criteria: Content and Ideas 1 (Limited): Ideas are irrelevant or minimally related to the topic. Lacks awareness of the issue concerned. No clear viewpoint. 2 (Basic): Ideas are somewhat related but vague. Minimal awareness of the issue concerned. Viewpoint unclear. 3 (Developing): Ideas are relevant but basic. Some awareness of the issue concerned. Viewpoint present but weakly developed. 4 (Proficient): Ideas are relevant and solid. Good awareness of the issue concerned. Clear viewpoint with some depth. 5 (Excellent): Ideas are insightful and highly relevant. Strong awareness of the issue concerned. Well-developed, compelling viewpoint.

Criteria: Organisation and Logical Progression 1 (Limited): No clear structure. Ideas are disjointed with no development or progression. 2 (Basic): Basic structure with unclear paragraphing. Ideas are listed with little development. 3 (Developing): Clear structure with some paragraphing. Ideas are developed but lack depth or logical flow. 4 (Proficient): Well-organized with clear paragraphs. Ideas are developed logically with good flow and support. 5 (Excellent): Highly organized with effective paragraphing. Ideas are thoroughly developed with seamless, logical progression.

Criteria: Vocabulary 1 (Limited): Vocabulary is limited, repetitive, or inaccurate. Lacks topic-specific terms. 2 (Basic): Basic vocabulary with some repetition. Minimal use of topic-specific terms. 3 (Developing): Adequate vocabulary with some variety. Includes some topic-specific terms but with occasional errors. 4 (Proficient): Varied and precise vocabulary. Effective use of topic-specific terms. Minor errors. 5 (Excellent): Rich, precise vocabulary. Masterful use of topic-specific terms. Almost error-free and sophisticated.

Criteria: Grammar and Sentence Structure 1 (Limited): Frequent grammatical and spelling errors. Sentences are incomplete or confusing. 2 (Basic): Several grammatical and spelling errors. Sentences are simple and often flawed. 3 (Developing): Some grammatical and spelling errors. Sentences are mostly correct but lack variety. 4 (Proficient): Minor grammatical and spelling errors. Sentences are varied and mostly accurate. 5 (Excellent): Virtually error-free grammar and spelling. Sentences are complex, varied, and accurately constructed.

Part 2: AI-Assisted Review Skills (10%) A. In-Depth Conversation with AI 1 (Limited): No exchanges or chat history; no questions asked. 2 (Basic): Sparse conversation; one or two simple questions. 3 (Developing): Adequate exchanges; some relevant questions. 4 (Proficient): Robust interaction; detailed, relevant questions across levels. 5 (Excellent): Extensive, well-documented chat history; insightful, multi-level questioning.

B. Critical Review of AI Suggestions 1 (Limited): All AI suggestions accepted blindly. 2 (Basic): Most accepted; little analysis. 3 (Developing): Some evaluated; partial justification. 4 (Proficient): Most critically reviewed with clear justification. 5 (Excellent): All evaluated thoroughly with strong, evidence-based reasoning.

C. Refining Process 1 (Limited): No revisions made. 2 (Basic): Minimal revisions; no iteration. 3 (Developing): Some revisions with limited iteration. 4 (Proficient): Clear iterative process with multiple revisions. 5 (Excellent): Extensive refinement with iterative improvements.

Contribution Analysis

Thank you for sharing the chat history and the assessment report summary. Here's a focused analysis and feedback to help you make the most of future AI-assisted revision sessions:

Key Observations from Your Interaction and Essay Revision

Clear Engagement With the Process:

You consistently followed the assistant's suggested three-step plan: revise thesis, revise topic sentence, and revise one body paragraph. This shows good strategic planning and ability to engage with stepwise guidance.

Improved Thesis and Paragraph:

Your revised thesis is clearer and more confident, previewing main points. The first body paragraph now has a stronger topic sentence and expanded, relevant examples, which improved clarity and organization.

Missed Opportunity to Fully Revise All Paragraphs:

The second body paragraph retained original phrasing and grammatical errors. Fully applying the same revision approach would have raised your overall essay clarity and cohesion.

Limited Critical Review of AI Suggestions:

You accepted AI directions and frames but provided little feedback on alternative suggestions or language options. Active evaluation (accepting/rejecting or modifying suggestions) would deepen your revision skills and lead to more polished writing.

Grammar and Word Choice Improvements Needed in Later Paragraphs:

While the first paragraph is greatly improved, other parts of the essay still contain errors and awkward phrasing. Revising all paragraphs carefully is essential for consistency and higher overall quality.

Recommendations for Your Future Revision Sessions

Apply the Full Revision Process to All Paragraphs:

Use the same three-step revision plan to rewrite topic sentences, clarify ideas, and fix grammar in every paragraph before finalizing your essay.

Deepen and Expand Evidence:

Add specific examples, brief data, or mention studies (even in summary) to support your claims more convincingly.

Engage Critically With AI Suggestions:

When the AI offers multiple options or phrases, try to compare them and choose the best fit for your voice and purpose. Explain why you accept or reject suggestions either in notes or draft comments.

Practice Sentence-Level Editing Independently:

After AI guidance, carefully proofread for article use, subject-verb agreement, plurals, and sentence completeness yourself or with a peer.

Focus on Transitions and Conclusion:

Refine paragraph transitions for better flow, and write a conclusion that synthesizes your key points clearly and powerfully.

Sample Next Steps for Your Revision

- Take the second body paragraph and rewrite the topic sentence into a clear argument sentence.
- Break down unclear sentences into shorter, grammatically correct ones.
- Replace phrases like “For another reason, as the development of AI using and applying” with:
“As AI technology develops and becomes widely applied, new types of jobs are emerging.”
- Add an example or two (e.g., “For example, universities offer courses on AI use and ethics, creating new teaching roles.”)

Final Encouragement

You are on a great path with your writing development and AI collaboration! By extending your thorough revision practice to all paragraphs and sharpening your critical evaluation, your writing clarity, coherence, and academic tone will improve substantially. Keep practicing these skills, and your essays will grow stronger and more convincing.

If you want, I can help you with specific sentence rewrites or draft a polished second body paragraph based on your ideas next. Just let me know!

Grading Result (Hidden from students)

Completed tasks check: - Revised the thesis statement: completed (revised thesis present in the Revised Essay). - Revised one of the topic sentences: completed (the first body paragraph topic sentence was rewritten). - Revised one of the body paragraphs: completed (the first body paragraph was substantially revised).

STUDENT ASSESSMENT REPORT

Course: LANG 0036 - Enhancing English through Global Citizenship

Module: AI for Revising Essays

ESSAY WRITING ASSESSMENT

Original Essay Scores:

- Content and Ideas: 15/25 - The original has a clear general position (automation will create opportunities) but ideas are underdeveloped and sometimes off-target; reasoning is vague and unsupported (e.g., "I will show my points as two parts" without clear development).
- Organization: 14/25 - Paragraphing is attempted but topic sentences and logical progression are weak; several sentence fragments interrupt flow (e.g., "Because of automation is transforming industries. It is clearly to image...").
- Vocabulary: 14/25 - Uses relevant topic words (automation, AI) but many awkward word choices and collocation errors ("job chance," "AI technolog," "no need for human").
- Grammar: 13/25 - Frequent errors in articles, subject-verb agreement, plurals, and sentence fragments reduce clarity ("Their is," "their still are," "is no need for human").
- **Original Essay Total: 56/100**

Evidence (original): - Thesis-like sentence: "And I do hope that this technological shift will undoubtedly enhance world's job chances and equity." (shows position but contains mixed hedging and grammatical issues) - Fragmented sentence example: "Because of automation is transforming industries." (grammatical error and fragment)

Revised Essay Scores:

- **Content and Ideas: 21/25** - The revised essay has a clear, focused thesis that previews two reasons ("push workers to build advanced skills, create new AI-related roles, and shift opportunities to creative, human-centric fields") and examples that support the argument. Further development/evidence could strengthen claims.
- **Organization: 21/25** - Structure improved: clear intro with thesis and a developed first body paragraph that follows the thesis. However, the second and concluding paragraphs still need revision for cohesion and clarity.
- **Vocabulary: 21/25** - Vocabulary is more precise in the revised sections (e.g., "global employment prospects," "human-centric roles"). Some remaining awkward phrases and repetitions remain in later paragraphs (they retain original errors).
- **Grammar: 20/25** - Many sentence-level errors were corrected in the revised opening and first body paragraph. However, the third paragraph in the revised essay still contains several grammatical mistakes and awkward constructions left from the original (e.g., "For another reason, as the development of AI using and applying. Their are some new jobs occur.").
- **Revised Essay Total: 83/100**

Evidence (revised): - Improved thesis: "While some fear job losses from AI and automation, this technological change will ultimately strengthen global employment and equity: it will push workers to build advanced skills, create new AI-related roles, and shift opportunities to creative, human-centric fields." - Improved topic sentence / paragraph opening: "Although AI can replace simple, repetitive jobs, it pushes workers to upgrade their skills, become more active job seekers, and pursue roles that leverage human creativity and empathy—roles that AI cannot replicate." - Remaining problem example (unchanged from original paragraph): "For another reason, as the development of AI using and applying. Their are some new jobs occur."

Essay Improvement Analysis:

- **Overall Improvement: +27 points**
- **Key Improvements Made:**
 - Revised, clear thesis that states a position and previews reasons (improves Content and Organization).
 - Stronger topic sentence and expanded first body paragraph with clearer examples (e.g., robots doing routine tasks and human-centric roles like teachers and accountants).
 - More precise vocabulary in key places ("global employment prospects," "human-centric roles") and improved sentence structure in several paragraphs.
- **Missed Opportunities:**

- The second body paragraph (the paragraph about new AI jobs and education) was left largely unchanged and retains grammatical and phrasing errors — it needed the same polishing applied to the first body paragraph.
- Evidence and development could be stronger: include concrete data, statistics, or more concrete examples to support claims about job creation and training.
- Improve transitions between paragraphs and refine the conclusion to more clearly synthesize the essay's reasons and implications.

HUMAN-AI INTERACTION ASSESSMENT

Chat History Analysis:

- **Total Exchanges:** 7 (assistant → user → assistant → user → assistant → user → assistant)
- **Conversation Quality:** Focused but brief. The assistant provided a clear revision plan and diagnostic feedback; the student repeatedly requested the three revision steps and pasted content. The chat shows guided instruction and the student followed steps, but there is little evidence of deep questioning, critical evaluation, or multiple iterative rounds of revision in the recorded history.

Interaction Scores:

- **In-Depth Conversation:** 3/5 - The conversation is adequate and task-focused (7 exchanges), the assistant guided a stepwise revision process, but the exchange count and depth are modest compared with an extensive iterative revision cycle.
- Evidence: Assistant outlined a 3-step process and diagnostics; student accepted directions with short responses like "Step 1: Revise thesis statement".
- **Critical Review of AI Suggestions:** 2/5 - Limited critical engagement shown. The student accepted the assistant's plan and pasted content but did not document evaluation or selective acceptance/rejection of AI suggestions in the chat.
- Evidence: The user consistently asked to proceed with steps rather than critiquing or choosing among alternative suggestions; no examples of the student rejecting or substantially modifying assistant proposals in the chat history.
- **Refining Process:** 3/5 - Some iteration occurred (assistant provided frames and diagnostics; student produced a revised essay), but the chat shows few rounds of back-and-forth polishing of the same sentences.
- Evidence: Assistant requested the student to try a thesis frame; the revised essay shows a reworked thesis and body paragraph, but the conversation did not record multiple draft-feedback cycles for the same passages.

- **Human-AI Interaction Total: 8/15**

OVERALL PERFORMANCE SUMMARY

Strengths Demonstrated:

- **Clear stance and improved thesis:** The student moved from an unclear, grammatically weak thesis to a focused thesis that previews reasons (evidence: revised thesis sentence).
- **Successful application of AI guidance:** The student followed the assistant's 3-step plan and revised the thesis and at least one body paragraph accordingly.
- **Use of relevant examples:** The revised paragraph provides concrete examples (take-away robots, house-cleaning robots, factory robots) and correctly distinguishes human-centric roles.

Areas for Improvement:

- **Complete revision of remaining paragraphs:** The second/third body paragraphs were not fully revised and still contain errors and unclear phrasing. Recommendation: apply the same stepwise revision to these paragraphs.
- **Deepen evidence and development:** Add stronger support (statistics, references, more detailed scenarios) to back claims about job creation and training needs.
- **Increase critical engagement with AI:** Actively evaluate and select among AI suggestions; when an AI offers multiple options, explain why you accept/reject a version to show critical thinking.

AI Collaboration Skills Assessment:

- **Context Provision:** Good - The student supplied the full essay text and repeatedly requested targeted steps. Evidence: student pasted original essay and asked explicitly for thesis/topic/paragraph revision.
- **Strategic Planning:** Good - The student followed a clear three-step revision plan and completed core steps. Evidence: revised thesis and paragraph reflect plan execution.
- **Critical Evaluation:** Needs Improvement - The chat shows limited documented critique of AI suggestions; the student largely accepted the assistant's guidance without recorded evaluation.

- **Independent Editing:** Good - The student produced a revised essay that demonstrates independent application of assistant feedback (thesis and paragraph rewritten), but further independent edits are required for remaining paragraphs.

RECOMMENDATIONS FOR FUTURE DEVELOPMENT

1. Revise the remaining paragraphs with the same process used for the first body paragraph: write a clear topic sentence, provide specific evidence, explain how it supports the thesis, and add a closing sentence that links back to the thesis.
2. Strengthen evidence: include concrete examples, brief statistics, or cited reports (even a sentence referencing trends or studies) to substantiate claims about job creation and the need for training.
3. Practice critical engagement with AI: when the AI offers alternatives (multiple thesis sentences, phrasing options), explicitly compare them and explain the choice—this will demonstrate higher-level collaboration and improve the final product.

INSTRUCTOR NOTES

- The student has clearly benefited from the AI-guided revision: the thesis and one body paragraph were substantively improved. However, the essay still contains an unrevised paragraph carrying over original grammar and phrasing issues; the student should be encouraged to apply the same revision steps to the whole essay.
- If the course assignment required a different topic (e.g., climate change), note that the student did not address that prompt in the essay; confirm that the topic choice (automation & jobs) is acceptable for grading.

■■■ Student Feedback ■ Rating: 5/5 ■ Comment: no

Complete Conversation

Assistant:

Original:

As the trend of automation is transforming industries, when the efficiency increased, the job chance may result in decline. Their is a debate between the enhance or undermine of global employment prospects in long-run term. And I do hope that this technological shift will undoubtedly enhance world's job chances and equity.

I will show my points as two parts. For one part is the advantages between job seek and job chose. For another is the potential job due to automation AI technolog.

Because of automation is transforming industries. It is clearly to image that AI may replace some simply but nessiry job. For example, we have take-away robots, house-cleaning robots and for industry, their are also some jobs that are no need for human. But is it means they will leads to jobless? I think it can enhance people's skills and force them to be a job seeker. Developing their talents and passion for looking for a better job. At the same time, their still are some jobs that AI can not replace. Like teachers, accountant... People still have chance to develop their ability to show that AI is just a tool.

For another reason, as the development of AI using and applying. Their are some new jobs occur. We need people to control the use of AI. Make the AI-using more properly and legally. Besides, we need people to transform AI, teaching more people to apply AI in their daily life. When boosting efficiency, it may also increase jobs by another way. For example, many universities develop a new lecture named "AI lesson" that can teach and control students to use AI tools. It can also give more people to be a "teacher".

All in all, global employment will become more powerful and colorful because of technological development. Jobs would not decrease but shift to the more talented and quantity people.

Revised:

As automation transforms industries and boosts efficiency, a debate has emerged over whether this shift will enhance or undermine global employment prospects in the long run. While some fear job losses from AI and automation, this technological change will ultimately strengthen global employment and equity: it will push workers to build advanced skills, create new AI-related roles, and shift opportunities to creative, human-centric fields.

Although AI can replace simple, repetitive jobs, it pushes workers to upgrade their skills, become more active job seekers, and pursue roles that leverage human creativity and empathy—roles that AI cannot replicate. As automation transforms industries, it is easy to imagine AI taking over routine tasks: take-away robots deliver food, house-cleaning robots handle chores, and industrial robots perform repetitive factory work, eliminating the need for human labor in these areas. However, this does not mean widespread joblessness. Instead, AI encourages workers to develop their talents and pursue more fulfilling, skilled roles. For example, while AI can grade homework or process data, it cannot replace teachers who build emotional connections with students or accountants who provide strategic financial advice. By shifting focus to these human-centric roles, workers can demonstrate that AI is a tool to augment their abilities, not replace them.

For another reason, as the development of AI using and applying. Their are some new jobs occur. We need people to control the use of AI. Make the AI-using more properly and legally. Besides, we need people to transform AI, teaching more people to apply AI in their daily life. When boosting efficiency, it may also increase jobs by another way. For example, many universities develop a new lecture named "AI lesson" that can teach and control students to use AI tools. It can also give more people to be a "teacher".

All in all, global employment will become more powerful and colorful because of technological development. Jobs would not decrease but shift to the more talented and quantity people.

Assistant:

Hi there! ■ I'm your English writing coach, here to help you strengthen your essay through clear, focused revision. Before we dive in, we'll take a moment to set some goals together.

Here's how our session will work:

Negotiate your targets — We'll start by discussing what you want to improve most in your essay.

Get a quick diagnosis — I'll give you feedback on your essay based on key writing rubrics (like thesis, organization, evidence, and language).

Choose what to focus on — You'll decide which issues you'd like to work on first.

Then we'll move through a structured, three-step revision process:

Step 1: Revise your thesis statement.

Step 2: Choose one body paragraph and refine its topic sentence.

Step 3: Revise the rest of that paragraph for clarity and coherence.

My role is to guide you with questions, feedback, and examples—but you'll always lead the revisions yourself. ■

You:

Step 1: Revise thesis statement

Assistant:

Great — let's start carefully so the revision session is focused and useful. I'll guide you step■by■step, but first we need to agree learning targets and check the essay against the assignment.

1) Quick goals check

Tell me which of these you most want to work on today (pick up to 3):

- Make the essay answer the assignment prompt (on topic)
- Write a clear, strong thesis
- Improve organization and paragraph connections
- Strengthen topic sentences and paragraph unity
- Improve grammar and word choice (accuracy & formality)
- Develop evidence and explanation (support for claims)

Anything else you'd like to add?

2) Short diagnostic feedback (based on the rubric categories)

I reviewed your draft. Here are strengths and areas to improve — brief and clear:

Content & Ideas

Strengths: You have a clear overall position (automation will create more/better jobs) and you try to support it with examples.

Needs work: The essay does not match the prompt I was given earlier (climate change individual vs government). If the assignment really asks about climate change, this is a major problem. Also ideas are general and need clearer development and stronger reasons/evidence.

Organisation & Logical Progression

Strengths: You tried to divide the essay into two main parts.

Needs work: Paragraphs are short and some sentences are fragmented. Topic sentences are unclear and the logical flow between sentences needs tightening.

Vocabulary

Strengths: Some topic-specific words (automation, AI).

Needs work: Many word-choice errors and informal phrases. Aim for precise academic vocabulary and fewer repetitions.

Grammar & Sentence Structure

Strengths: Sentences show some variety of ideas.

Needs work: Frequent grammatical errors (subject-verb agreement, articles, plurals), sentence fragments, and informal punctuation. These reduce clarity.

Provisional rubric impression: currently around Developing (3) in Content/Organization and Basic (2–3) in Vocabulary and Grammar. Fixing topic/thesis and organization would raise your score most quickly.

3) Decide priorities

Which of the diagnosed issues do you want to focus on in this session? (I recommend: 1) ensure the essay is on the correct prompt, 2) revise the thesis, and 3) improve one body paragraph's topic sentence and support. But choose what you prefer.)

Please confirm your chosen targets before we move to Step 1.

4) Important question about the assignment/topic

The prompt I was given concerns climate change and whether individual actions matter compared with governments/corporations. Your draft discusses automation and jobs. Do you want to:

- A) Rework this automation essay to become a strong, self-contained essay (about automation and jobs), or
- B) Rebuild the essay so it answers the climate change prompt instead?

Choose A or B. This matters because the thesis must directly answer the assigned question.

5) Step 1: Thesis statement revision — preparation

Once you confirm targets and whether we keep the automation topic or switch to climate change, please tell me which sentence in your draft you want to use as the current thesis (I think you intended this sentence: "And I do hope that this technological shift will undoubtedly enhance world's job chances and equity."). Is that the thesis you want to revise?

Quick feedback on that current thesis:

- It's hedged and unclear ("I do hope," "undoubtedly" combined with "hope" is mixed).
- It's grammatically incorrect (missing articles: "the world's job chances"; word forms: "job opportunities" instead of "job chances").
- It doesn't preview the essay's main reasons (what main points will you use to support this claim?).
- If we stick to the climate-change prompt instead, this thesis is off■topic.

Before I help you refine it, would you like to try rewriting the thesis now? Useful structure to follow (not a full sentence I'll write for you, just a frame you can use):

- State your clear position (agree / disagree / partially agree).
- Add two brief reasons that you will develop in the essay (preview).
- Use confident, academic language (avoid "I think," "I hope," "maybe").

Example frame: "[Position] because [reason 1] and [reason 2]." (Please fill in the blanks with your idea.)

Would you like to try writing a revised thesis now using that frame? I'll give focused feedback and help you polish it.

You:

As the trend of automation is transforming industries, when the efficiency increased, the job chance may result in decline. There is a debate between the enhance or undermine of global employment prospects in long-run term. And I do hope that this technological shift will undoubtedly enhance world's job chances and equity

Step 1: Revise thesis statement

Assistant:

Great — let's finish the negotiation quickly so we can start Step 1.

1) Choose up to 3 revision targets for today (pick which you want me to focus on):

- Make the essay answer the assignment prompt (on topic)
- Write a clear, strong thesis
- Improve organization and paragraph connections
- Strengthen topic sentences and paragraph unity
- Improve grammar and word choice (accuracy & formality)
- Develop evidence and explanation (support for claims)

Which do you want to work on? (You can pick up to three. I recommend: clear thesis, topic sentence + paragraph unity, and grammar/word choice.)

2) Quick diagnostic summary (short):

- Strengths: You have a clear overall position that automation can create new opportunities; you use relevant examples (robots, AI lessons).
- Main problems to fix first: the thesis is unclear and grammatically weak; paragraphs have unclear topic sentences and some sentence fragments; many word-choice and grammar errors that reduce clarity.
- Provisional rubric level: roughly Developing (content/organization) and Basic (vocab/grammar). Fixing thesis and one paragraph will give the biggest improvement quickly.

3) Important: stay on topic?

Your draft is about automation and jobs. The assignment I saw earlier was about climate change — please confirm: do you want to

A) keep this essay on automation and jobs, or

B) rework the essay to answer the climate-change prompt instead?

(Choose A or B.)

4) Confirm the current thesis sentence

Which sentence do you want to revise as your thesis? I think you meant:

"And I do hope that this technological shift will undoubtedly enhance world's job chances and equity."

Is that the sentence to revise? (Yes / No — or paste the exact sentence you want as your current thesis.)

5) Quick feedback on that thesis (before you rewrite)

- Tone and phrasing: It uses hedging ("I do hope") plus an absolute word ("undoubtedly") — this is mixed and weak for academic writing. Use a confident, objective statement instead of personal hope.
- Grammar and word choice: "world's job chances" is not natural. Use "global employment prospects" or "job opportunities." Add articles: "the world's..." or "global..."
- Structure: It doesn't preview the main reasons you will use to support the claim. A strong thesis should state your position and briefly signal the two main reasons you will develop.
- Example frame to use (fill in X and Y with your reasons): Automation will ultimately enhance global employment prospects because X and Y.

Would you like to try rewriting the thesis now using that frame? Write one sentence and I'll give quick feedback and help you polish it. If you prefer, I can show 1–2 model thesis sentences after you try. Which do you want to do?

You:

Step 1: Revise thesis statement

Step 2: Revise topic sentences

Step 3: Revise one body paragraphAs the trend of automation is transforming industries, when the efficiency increased, the job chance may result in decline. Their is a debate between the enhance or undermine of global employment prospects in long-run term. And I do hope that this

technological shift will undoubtedly enhance world's job chances and equity.

I will show my points as two parts. For one part is the advantages between job seek and job chose. For another is the potential job due to automation AI technolog.

Assistant:

Great — this will be a short, focused session. First, let's set clear targets and check the essay against the rubric so we revise efficiently.

1) Choose up to 3 targets to work on now (pick which you want me to focus on):

- Make the essay answer the assignment prompt (on topic)
- Write a clear, strong thesis
- Improve organization and paragraph connections
- Strengthen topic sentences and paragraph unity
- Improve grammar and word choice (accuracy & formality)
- Develop evidence and explanation (support for claims)

Which do you choose? (You can pick up to three. I recommend: clear thesis; topic sentence + paragraph unity; grammar/word choice.)

2) Quick diagnostic feedback (very brief, rubric-focused)

- Content & Ideas: Strength — you have a clear position that automation will create opportunities. Needs work — reasons are general and underdeveloped; the essay may not match the course prompt (see question below).
- Organisation & Logical Progression: Strength — you tried to split ideas into two parts. Needs work — paragraph topic sentences are unclear and sentence-level flow is weak.
- Vocabulary: Strength — you use topic words (automation, AI). Needs work — frequent word-choice errors; use more precise academic vocabulary.
- Grammar & Sentence Structure: Needs work — many errors (articles, subject-verb agreement, fragments) that reduce clarity.

Provisional level: roughly Developing (3) for Content/Organization; Basic (2–3) for Vocabulary & Grammar. Fixing thesis and one paragraph will give the biggest immediate improvement.

3) Important: stay on the right prompt

The assignment prompt I have asks about climate change (individual vs. government). Your draft is about automation and jobs. Which do you want to do for this session?

- A) Keep and improve this automation essay (about automation and jobs), or
- B) Rework the essay to answer the climate-change prompt?

Choose A or B.

4) Confirm which sentence is your current thesis

Which sentence do you want to revise as your thesis? I believe you mean:

"And I do hope that this technological shift will undoubtedly enhance world's job chances and equity."

Is that the thesis you want to revise? (Yes / No — or paste the exact sentence you want to use as your current thesis.)

Quick feedback on that thesis (before you rewrite)

- Tone & stance: It uses personal language ("I do hope") and an absolute word ("undoubtedly") — that's mixed and weak for academic writing. Use a confident, objective statement instead of personal hope.
- Grammar & word choice: "world's job chances" is awkward. Use "global employment prospects" or "job opportunities." Include needed articles: "the world's..."
- Structure: It does not preview the main reasons you will use. A strong thesis should state your position and briefly preview 2 main reasons you will develop.

5) Step 1: Try rewriting the thesis now

Please try writing one sentence that:

- Clearly answers the question (if A, that automation ultimately enhances or undermines employment; if B, follows the climate prompt),
- Gives two brief reasons you will explain in the essay,
- Uses confident, academic language (avoid "I think," "I hope").

Useful frame to fill in:

- If keeping automation topic: "Automation will ultimately enhance global employment prospects because [reason 1] and [reason 2]."
- If switching to climate prompt (example frame): "Individual actions can/cannot significantly address climate change compared with government and corporate policies because [reason 1] and [reason 2]."

Would you like to try writing the revised thesis now? Type one sentence and I'll give quick feedback and help you polish it. If you prefer, I can show 1–2 model thesis sentences after you try. Which do you want?
