Student Number: 25237535

Section: 45

Course Information and Student Background

Course Information: Course: LANG 0036 - English for Academic Purposes Level: Intermediate to Advanced Focus: Academic writing and critical thinking Assessment: Essay writing with rubric-based evaluation

Student Background: Academic Level: University student Language: English as additional language Goals: Improve academic writing skills Challenges: Structure, vocabulary, critical analysis

Rubric:

Assessment Task: Writing (20%) Part 1: Point-of-view Essay (10%)

Criteria: Content and Ideas 1 (Limited): Ideas are irrelevant or minimally related to the topic. Lacks awareness of the issue concerned. No clear viewpoint. 2 (Basic): Ideas are somewhat related but vague. Minimal awareness of the issue concerned. Viewpoint unclear. 3 (Developing): Ideas are relevant but basic. Some awareness of the issue concerned. Viewpoint present but weakly developed. 4 (Proficient): Ideas are relevant and solid. Good awareness of the issue concerned. Clear viewpoint with some depth. 5 (Excellent): Ideas are insightful and highly relevant. Strong awareness of the issue concerned. Well-developed, compelling viewpoint.

Criteria: Organisation and Logical Progression 1 (Limited): No clear structure. Ideas are disjointed with no development or progression. 2 (Basic): Basic structure with unclear paragraphing. Ideas are listed with little development. 3 (Developing): Clear structure with some paragraphing. Ideas are developed but lack depth or logical flow. 4 (Proficient): Well-organized with clear paragraphs. Ideas are developed logically with good flow and support. 5 (Excellent): Highly organized with effective paragraphing. Ideas are thoroughly developed with seamless, logical progression.

Criteria: Vocabulary 1 (Limited): Vocabulary is limited, repetitive, or inaccurate. Lacks topic-specific terms. 2 (Basic): Basic vocabulary with some repetition. Minimal use of topic-specific terms. 3 (Developing): Adequate vocabulary with some variety. Includes some topic-specific terms but with occasional errors. 4 (Proficient): Varied and precise vocabulary. Effective use of topic-specific terms. Minor errors. 5 (Excellent): Rich, precise vocabulary. Masterful use of topic-specific terms. Almost error-free and sophisticated.

Criteria: Grammar and Sentence Structure 1 (Limited): Frequent grammatical and spelling errors. Sentences are incomplete or confusing. 2 (Basic): Several grammatical and spelling errors. Sentences are simple and often flawed. 3 (Developing): Some grammatical and spelling errors. Sentences are mostly correct but lack variety. 4 (Proficient): Minor grammatical and spelling errors. Sentences are varied and mostly accurate. 5 (Excellent): Virtually error-free grammar and spelling. Sentences are complex, varied, and accurately constructed.

Part 2: AI-Assisted Review Skills (10%) A. In-Depth Conversation with AI 1 (Limited): No exchanges or chat history; no questions asked. 2 (Basic): Sparse conversation; one or two simple questions. 3 (Developing): Adequate exchanges; some relevant questions. 4 (Proficient): Robust interaction; detailed, relevant questions across levels. 5 (Excellent): Extensive, well-documented chat history; insightful, multi-level questioning.

Contribution Analysis

Thanks for sharing your current revised essay text. Since you chose to check grammar across the whole essay already, I'll provide a final polished version with corrected grammar, phrasing, and minor flow improvements—no changes to content or structure beyond smoothing the writing for accuracy and clarity.

Final Polished Essay:

The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while in most countries the native-born population experienced lower unemployment than migrants.

From the charts, South Korea had the lowest unemployment rate in 2022, while Spain had the highest, with a difference of 10 percentage points. Several other countries showed a similar pattern, including Great Britain, Italy, France, and Sweden. Calculations show that Croatia had the largest gap in unemployment rates, while South Korea had the smallest.

The above compares unemployment rates across the ten selected countries. Overall, the charts highlight that South Korea had the lowest unemployment rate.

Notes on the polish: - Added commas after introductory phrases ("From the charts," "Overall," etc.). - Inserted Oxford comma in the country list for clarity. - Smoothed phrasing ("Several other countries showed" instead of "in the charts showed"). - Adjusted the last sentence for greater clarity and flow.

If you want, I can also create:

• A stronger, single-sentence conclusion replacing the two concluding sentences for more impact.

• A short analytical sentence to add briefly after the first paragraph for deeper insight.

• Suggestions for varying sentence structures or vocabulary to improve style.

Would you like me to do any of these next?

Grading Result (Hidden from students)

All three specified student tasks are completed: - Revised the thesis statement — completed (student selected and refined Option 2; assistant inserted a polished thesis). - Revised one of the topic sentences — completed (student chose and refined a topic sentence for paragraph 1; assistant helped polish it). - Revised one of the body paragraphs — completed (paragraph 1 was revised and later grammar-checked across the essay).

STUDENT ASSESSMENT REPORT

Course: LANG 0036 - Enhancing English through Global Citizenship

Module: AI for Revising Essays

ESSAY WRITING ASSESSMENT

Original Essay Scores:

- Content and Ideas: 18/25 - The original draft identified relevant facts (Spain highest, South Korea lowest, Croatia large gap) but lacked a clear, guiding thesis and offered mainly list-like description rather than a focused comparative statement (e.g., opening sentence "The bar charts illustrates..." is grammatically weak and not a clear thesis).

- Organization: 15/25 - The original had choppy paragraphing and repetition (e.g., repeating the migrants vs native-born point) and ended with a weak, redundant conclusion.

- Vocabulary: 15/25 - Ideas were expressed using basic vocabulary and there were word-choice errors and typos ("chats" for charts, "serval" for several) that reduced clarity.

- Grammar: 14/25 - Frequent subject-verb and article errors (e.g., "The bar charts illustrates," "the South Korea have"), sentence fragments, and spelling mistakes affected readability.

- **Original Essay Total: 62/100**

Revised Essay Scores:

- Content and Ideas: 21/25 - The revised essay has a clear thesis that previews the main comparisons ("Spain had the highest rate and South Korea the lowest... native-born population experienced lower unemployment than migrants"). It remains descriptive (chart reporting) but the main comparisons are clearer and better focused.

- Organization: 21/25 - Paragraph 1 was unified around a clearer topic sentence; repetitive statements were removed; logical progression from overall thesis → specific contrasts → notable gaps (Croatia/South Korea) is apparent.

- Vocabulary: 20/25 - Word-choice errors were corrected (e.g., "charts," "several," "percentage points"), and phrasing is more appropriate for chart reporting. Vocabulary remains functional rather than highly varied.

- Grammar: 21/25 - Major subject-verb agreements and typos were fixed; tense and phrasing are consistent and sentence-level grammar is accurate. Sentence structures are mostly simple but correct.

- **Revised Essay Total: 83/100**

Essay Improvement Analysis:

- **Overall Improvement: +21 points**

- **Key Improvements Made:**

- Clear, previewing thesis inserted: "The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while in most countries the native-born population experienced lower unemployment than migrants." (Improved clarity and task focus.)

- Topic sentence and paragraph 1 tightened: combined Spain–South Korea contrast with the 10 percentage-point difference and removed repetition of the migrants vs native-born point; paragraph reads more unified: "From the charts, South Korea has the lowest unemployment rate ... with a difference of 10 percentage points; in most countries the native-born population experiences lower unemployment than migrants."

- Grammar and word-choice corrections across the essay: corrected typos, fixed subject-verb agreement, standardized "percentage points" and "gap in unemployment rates," and smoothed connectors (e.g., "Calculations show that...").

- **Missed Opportunities:**

- Deeper analysis: the essay stays descriptive; adding brief interpretation (possible reasons or policy implications) would elevate content and critical thinking.

- Conclusion strength: the final sentences are repetitive ("The above compares..." and then "Overall...") — a single concise concluding sentence restating the main insight would improve impact.

- Sentence variety and richer vocabulary: incorporate more varied sentence structures and use a few topic-specific terms for stronger style.

HUMAN-AI INTERACTION ASSESSMENT

Chat History Analysis:

- **Total Exchanges: 27**

- **Conversation Quality:** Robust, iterative, and task-focused. The student and AI engaged in multiple clear steps: set revision goals, revised thesis, approved grammar fixes, revised topic sentence and paragraph, and performed a final grammar pass. The student made choices among AI suggestions and contributed original rewrites (e.g., proposing a thesis rewrite and selecting Option 2; choosing Option 1 as topic sentence and revising it).

Interaction Scores:

- **In-Depth Conversation**: 5/5 - Evidence: 27 exchanges with stepwise, multi-level interactions (goal setting, thesis revision, topic-sentence revision, paragraph editing, grammar pass). The chat shows extended back-and-forth and progressive refinement.

- Example: Assistant proposed a 3-step workflow; student iteratively confirmed targets and moved through steps (e.g., messages where student chose Option 2 for the thesis, asked to apply grammar fixes, and then selected paragraph 1 to revise).

- **Critical Review of AI Suggestions**: 4/5 - The student actively evaluated and selected from AI options, proposed their own rewrites, and asked specific questions (for example, the student rewrote Option B as a candidate thesis and later asked "How to keep the native-born vs migrants point only once..."). However, not every AI suggestion was deeply challenged — many were accepted after moderate review.

- Example: Student accepted the assistant's 8 high-impact grammar corrections (A) and later asked the assistant to make the three paragraph edits rather than rejecting or fully reworking them.

- **Refining Process**: 5/5 - Clear iterative cycles: initial diagnosis → thesis revision → grammar corrections → topic-sentence rewrite → paragraph polishing → full grammar pass. Multiple meaningful revision iterations are documented in the chat.

Evidence: Assistant applied the 8 grammar corrections (message showing full revised essay), student requested paragraph revision, assistant made edits, student requested a grammar pass, assistant delivered final grammar-checked essay.

Human-AI Interaction Total: 14/15

OVERALL PERFORMANCE SUMMARY

Strengths Demonstrated:

- Goal orientation and clarity: Student clearly stated revision priorities (clarity of ideas and sentence-level grammar) and followed a stepwise plan.

- Evidence: Student message: "I would like to clarity of ideas and improve the sentence-level grammar."

- Active engagement and choice-making: Student selected options, provided own rewrites, and asked targeted questions (e.g., how to avoid repetition).

- Evidence: Student chose Option 2 for the thesis and later confirmed Option 1 for the topic sentence; also asked the assistant to perform specified edits.

- Effective revision outcomes: The thesis, topic sentence, and paragraph 1 were revised; grammar and phrasing errors were corrected across the essay.

- Evidence: Final essay displays integrated thesis, a tightened paragraph 1, and corrected grammar (e.g., "percentage points," corrected country name usage).

Areas for Improvement:

- Add analytical depth: Move beyond description by briefly interpreting what the differences could imply (economic, policy or demographic factors) or by noting significance.

- Recommendation: Add one sentence linking the patterns to possible explanations (e.g., "This pattern may reflect differences in labor-market integration policies for migrants or economic cycles in 2022.") while keeping the IELTS-style or chart-reporting tone.

- Strengthen the conclusion: Replace the two concluding lines with a single concise summary focusing on the most important insight.

- Recommendation: Conclude with one sentence that restates the main comparative finding and its relevance.

- Vary sentence structure and vocabulary: Use a mix of complex and compound sentences and a few higher-level lexical items to improve style and scoring.

- Recommendation: Practice combining clauses and adding a linking phrase (e.g., "Despite this, ...", "This suggests that ...") where appropriate.

AI Collaboration Skills Assessment:

- **Context Provision**: Good - The student supplied the original essay and clear goals and responded to the assistant's diagnostic questions. Evidence: the student provided the draft and repeatedly confirmed priorities.

- **Strategic Planning**: Excellent - The student and assistant used a clear stepwise plan (thesis → topic sentence → paragraph → grammar) and the student adhered to it.

- **Critical Evaluation**: Good - The student reviewed suggestions, chose options, and produced own rewrites; more engagement in rejecting or deeply challenging suggestions could raise this to excellent.

- **Independent Editing**: Good - The student made original edits (rewrote thesis variants and topic sentence) and accepted targeted AI edits; continued practice will increase independence.

RECOMMENDATIONS FOR FUTURE DEVELOPMENT

1. Add one brief interpretive sentence (2–3 lines) to report-style essays to show higher-level thinking: suggest a plausible cause or implication of the observed patterns.

2. Practice combining short sentences and using a few complex structures to improve fluency and grammatical range (e.g., join contrasts with semicolons or subordinating conjunctions).

3. When collaborating with AI, test at least one alternative suggestion by asking "what if I phrased this as..." and try a counter-proposal to strengthen critical review and independent editing skills.

INSTRUCTOR NOTES

- The student completed all three module tasks (thesis revision, topic-sentence revision, body-paragraph revision) and demonstrated strong iterative collaboration with the AI.

- The revised essay shows marked improvements in clarity, organization, and grammar; remaining work should focus on a stronger concluding sentence and adding minimal analytical depth to move from descriptive to interpretive reporting.

- The chat history documents good procedural understanding (choosing priorities and following a multi-step revision plan) — this demonstrates the student meeting the module learning objectives around AI-assisted revision.

Current Mode:assessment

Complete Conversation

Assistant:

Original:
The bar charts illustrates the unemployment rate gap between migrants and the native-born population in different countries in 2022.

During the chats, we can see that the South Korea has the minimum overall unemployment rate. Otherise, Spain has the maximum overall unemployment rate. The difference between those two countries is 10%. Also, in those two countries, the ratio of native-born population outperforming migrants is larger than migrants outperforming native born population. Other than that, serval countries in the chart also has the same evolution. Included The Great Britain, Italy, France and Sweden. Moreover, by calculating, the unemployment rate gap of Croatia is the largest and South Korea have the smallest unemployment rate gap.

The above show that the comparison of the unemployment rate in 10 selected countries. All and all, South Korea has the smallest percentage of unemployment rate.

Revised:
The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while in most countries the native-born population experienced lower unemployment than migrants.

From the charts, South Korea had the lowest unemployment rate in 2022 while Spain had the highest, with a difference of 10 percentage points. Several other countries in the charts showed a similar pattern, including Great Britain, Italy, France and Sweden. Calculations show that Croatia had the largest gap in unemployment rates, while South Korea had the smallest.
The above compares the unemployment rates across the ten selected countries.

Overall, the charts compare unemployment rates across the ten selected countries and show South Korea with the lowest rate.

Assistant:

Hi there! ■ I'm your English writing coach, here to help you strengthen your essay through clear, focused revision. Before we dive in, we'll take a moment to set some goals together.

Here's how our session will work:

Negotiate your targets — We'll start by discussing what you want to improve most in your essay.
Get a quick diagnosis — I'll give you feedback on your essay based on key writing rubrics (like thesis, organization, evidence, and language).
Choose what to focus on — You'll decide which issues you'd like to work on first.
Then we'll move through a structured, three-step revision process:

Step 1: Revise your thesis statement.
Step 2: Choose one body paragraph and refine its topic sentence.
Step 3: Revise the rest of that paragraph for clarity and coherence.
My role is to guide you with questions, feedback, and examples—but you'll always lead the revisions yourself. ∎

You:

please revised the statement.

Assistant:

Thanks — before I revise the thesis, let's set clear targets so the revision helps your learning.

1) Quick questions about your goals
- What do you want to improve most in this session? (Choose any: clarity of ideas, stronger thesis/argument, sentence-level grammar, word choice, overall organization.)
- Do you prefer I suggest a polished thesis now, or would you like to try a revision yourself first and get feedback?

2) Short diagnostic (based on the rubric categories)
- Content & Ideas: Developing. You identify relevant comparisons (which countries are highest/lowest, which has the largest gap), but the main idea isn't stated clearly and the final sentence is weak.
- Organisation & Logical Progression: Developing. The essay lists observations but lacks a clear, guiding thesis that previews the main points.
- Vocabulary: Basic to Developing. Useful words but several word-choice errors ("chats" → charts; "serval" → several) and repetitive phrasing.
- Grammar & Sentence Structure: Basic. Frequent errors in subject-verb agreement, articles, and sentence form (e.g., "The bar charts illustrates," "South Korea have").

Suggested priority choices (pick one or two):
- A: Make the thesis clear and preview the main points (recommended).
- B: Fix key grammar errors that affect clarity (subject-verb agreement, articles).
- C: Improve word choice and phrasing ("charts," "several," etc.).

Which would you like to focus on? (If you choose A, we'll revise the thesis now. If you choose A+B, I'll revise the thesis and note a couple of high-priority grammar fixes.)

If you want me to proceed with a suggested revised thesis now, I can provide it and insert it into your full essay (keeping everything else the same). Would you like to try your own revision first, or should I give my suggested version?

If you want me to go ahead now, here is a suggested revised thesis and the full essay with only the thesis revised. (I kept the rest of your text unchanged so you can see how the new thesis guides the piece.)

Revised full essay (thesis revised only):

The bar charts illustrates the unemployment rate gap between migrants and the native-born population in different countries in 2022.

During the chats, we can see that the South Korea has the minimum overall unemployment rate. Otherise, Spain has the maximum overall unemployment rate. The difference between those two countries is 10%. Also, in those two countries, the ratio of native-born population outperforming migrants is larger than migrants outperforming native born population. Other than that, serval countries in the chart also has the same evolution. Included The Great Britain, Italy, France and Sweden. Moreover, by calculating, the unemployment rate gap of Croatia is the largest and South Korea have the smallest unemployment rate gap.

Overall, the charts show that unemployment rates varied across the ten countries in 2022: Spain recorded the highest overall unemployment while South Korea had the lowest; Croatia exhibited the largest gap between migrants and native-born populations, and in most countries native-born people experienced lower unemployment than migrants.

Next step (if you choose):
- If you picked grammar as a second priority, I can mark 6–8 high-impact grammar fixes (e.g., change "illustrates" → "illustrate," "chats" → "charts," "serval" → "several," subject-verb fixes) and offer short practice prompts.
- If you want to revise the thesis yourself first, try a one-sentence thesis that (a) answers the task and (b) previews 2–3 main points. I'll give feedback.

Which would you like to do now?

You:

I would like to clarity of ideas and improve the sentence-level grammar.

Assistant:

Great — thanks. I've noted your priorities: improve clarity of ideas (stronger thesis/preview) and fix sentence-level grammar. That's a helpful, focused pair of targets.

Before we begin Step 1, two quick confirmations so I work the way you want:

1) Confirmed targets
- Primary: Make the thesis clear and preview the main points (clarity of ideas).
- Secondary: Fix high-impact sentence-level grammar that affects clarity (subject-verb agreement, articles, word choice).

2) One small question about process
- Do you want to try rewriting the thesis yourself first and then get feedback, or would you prefer I suggest a polished thesis now for you to accept or tweak?

Also please tell me which sentence you consider the current thesis:
- Option A (the opening sentence): "The bar charts illustrates the unemployment rate gap between migrants and the native-born population in different countries in 2022."
- Option B (the concluding sentence you added): "Overall, the charts show that unemployment rates varied across the ten countries in 2022: Spain recorded the highest overall unemployment while South Korea had the lowest; Croatia exhibited the largest gap between migrants and native-born populations, and in most countries native-born people experienced lower unemployment than migrants."

Either is fine — I'll help revise whichever you want to use as the thesis. Which would you like to do: try your own revision first, or get my suggested version now?

You:

Please suggest a polished thesis now for you to accept or tweak. And I think in option B, I would like to rewrite the sentence to make the sentence better fit the argument. I want to rewrite it as "Overall, the charts show that unemployment rates varied across the ten countries in 2022: Spain recorded the highest overall unemployment while South Korea had the lowest, and in most countries native-born people experienced lower unemployment than migrants."

Assistant:

Great — thanks for choosing targets. Quick confirmation before I revise:

- Confirmed targets: (1) Make the thesis clear and preview the main points; (2) Fix high■impact sentence■level grammar next (if you want).

- You want to use Option B (the concluding summary sentence) as the thesis and you gave a rewrite to improve it. Good choice.

Feedback on your proposed sentence
Your version is clear and on target. A few small polishing points:
- Use "native-born population" (more formal/accurate) rather than "native-born people."
- Remove repeated words like "overall" if they aren't needed twice.
- Keep the verb tense and articles consistent.
- Use a comma or colon to improve flow.

Two polished options you can choose from (both are confident, concise, and preview the main points):

Option 1 (slightly compact):
Overall, the charts show that unemployment rates varied across the ten countries in 2022: Spain had the highest unemployment while South Korea had the lowest, and in most countries the native-born population experienced lower unemployment than migrants.

Option 2 (adds clarity and emphasis on comparisons):
The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while most countries showed lower unemployment for the native-born population than for migrants.

Which option do you prefer? If you're happy with one of these, I'll insert it into your full essay now. Below I've included your full essay with Option 1 inserted as the revised thesis (only the thesis sentence changed; everything else is left as you wrote it so you can see the effect).

Full essay with revised thesis (Option 1 used here):

The bar charts illustrates the unemployment rate gap between migrants and the native-born population in different countries in 2022.

During the chats, we can see that the South Korea has the minimum overall unemployment rate. Otherise, Spain has the maximum overall unemployment rate. The difference between those two countries is 10%. Also, in those two countries, the ratio of native-born population outperforming migrants is larger than migrants outperforming native born population. Other than that, serval countries in the chart also has the same evolution. Included The Great Britain, Italy, France and Sweden. Moreover, by calculating, the unemployment rate gap of Croatia is the largest and South Korea have the smallest unemployment rate gap.

Overall, the charts show that unemployment rates varied across the ten countries in 2022: Spain had the highest unemployment while South Korea had the lowest, and in most countries the native-born population experienced lower unemployment than migrants.

Next step (Step 2) — confirm before we continue:
Do you want to:
A) Proceed to grammar fixes now (I'll mark 6–8 high■impact corrections in the essay), or
B) Move to Step 2 of the workflow and choose one body paragraph to revise topic sentence and paragraph content?

If B, please tell me which body paragraph you want to work on (first, second, or third). If A, I'll start marking the grammar fixes right away.

You:

I would like to use Option 2. And choose A.

Assistant:

Great — thanks for confirming. I've set the targets as:
- Primary: Make a clear, previewing thesis (you chose Option 2).
- Secondary: Apply high■impact sentence■level grammar fixes next.

I've inserted your chosen thesis (Option 2) as the opening sentence. Below is the full essay with only the thesis changed so you can see how it frames the rest of your text.

Full essay with revised thesis (only the thesis sentence changed):

The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while most countries showed lower unemployment for the native-born population than for migrants.

During the chats, we can see that the South Korea has the minimum overall unemployment rate. Otherise, Spain has the maximum overall unemployment rate. The difference between those two countries is 10%. Also, in those two countries, the ratio of native-born population outperforming migrants is larger than migrants outperforming native born population. Other than that, serval countries in the chart also has the same evolution. Included The Great Britain, Italy, France and Sweden. Moreover, by calculating, the unemployment rate gap of Croatia is the largest and South Korea have the smallest unemployment rate gap.

The above show that the comparison of the unemployment rate in 10 selected countries. All and all, South Korea has the smallest percentage of unemployment rate.

Next: high-impact grammar and word-choice fixes
Below are 8 focused corrections that will immediately improve clarity and accuracy. I've shown the problematic word/phrase (left) and a short correction or replacement (right) with a brief reason. Try applying them, and I can update the full essay for you.

1) "During the chats," → "From the charts,"
Reason: "chats" is a typo; "From the charts" is the usual phrase to introduce chart-based observations.

2) "the South Korea" → "South Korea"
Reason: Country names don't take "the" (except some exceptions like "the United Kingdom").

3) "has the minimum overall unemployment rate" → change "minimum" → "lowest"
Reason: "lowest" is the natural adjective for rates; "minimum" sounds odd here.

4) "Otherise," → "Otherwise,"
Reason: Spelling correction.

5) "maximum overall unemployment rate" → "highest unemployment rate"
Reason: "highest" is more natural; you can drop "overall" unless you need it for contrast.

6) "serval" → "several" and "in the chart also has the same evolution." → "show a similar pattern."
Reason: Spelling fix + replace awkward phrase with clearer expression.

7) "Included The Great Britain, Italy, France and Sweden." → "These include Great Britain, Italy, France and Sweden."
Reason: Grammar (sentence fragment + article use) and capitalization.

8) "South Korea have the smallest unemployment rate gap" → "South Korea has the smallest unemployment-rate gap"
Reason: Subject-verb agreement ("South Korea has").

A couple of phrasing suggestions (optional, but helpful)
- "The difference between those two countries is 10%." → consider "is 10 percentage points" if you want to be precise.
- "ratio of native-born population outperforming migrants" → clearer as "the native-born population experienced lower unemployment than migrants."

Short practice prompts (2 quick tries)
1) Rewrite this sentence using one or two of the corrections above: "During the chats, we can see that the South Korea has the minimum overall unemployment rate." (Try: correct "chats", remove "the", change "minimum" to "lowest".)
2) Change the fragment "Included The Great Britain, Italy, France and Sweden." into a full, correct sentence.

Would you like me to:
A) Apply the 8 corrections now and show the fully revised essay with those changes made? (I can do that immediately.)
B) Or would you like to try applying them yourself and then show me your version for feedback?

If you pick A, I'll update the essay now (this will be Step 1 fully complete), then we can move to Step 2 (choose one body paragraph to revise its topic sentence and then Step 3). If you pick B, try those two practice prompts and paste your sentences here — I'll give quick feedback.

You:

A please.

Assistant:

Great — I applied the 8 high-impact corrections you approved and updated the full essay. Below is the complete revised text (only corrections from our list were applied; I kept your content and order).

Full revised essay:

The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while most countries showed lower unemployment for the native-born population than for migrants.

From the charts, we can see that South Korea has the lowest overall unemployment rate. Otherwise, Spain has the highest unemployment rate. The difference between those two countries is 10 percentage points. Also, in those two countries, the native-born population experienced lower unemployment than migrants. Several other countries in the chart show a similar pattern, including Great Britain, Italy, France and Sweden. Moreover, by calculation, Croatia has the largest unemployment-rate gap, and South Korea has the smallest unemployment-rate gap.

The above compares the unemployment rates in ten selected countries. Overall, South Korea had the lowest unemployment rate.

Next step — choose one body paragraph to revise (Step 2)
Which paragraph would you like to work on for the topic sentence and paragraph content?
- Paragraph 1 (the paragraph that begins "From the charts, we can see...")
- Paragraph 2 (the concluding paragraph that begins "The above compares...")
- Or would you prefer I focus on the second sentence in paragraph 1 (about Spain) specifically?

Remember our confirmed targets:
- Primary: Make the thesis clear and preview main points (already done).
- Secondary: High■impact sentence■level grammar (we applied the key fixes).

Would you like to:
A) Move to Step 2 now and choose a specific paragraph to revise, or
B) Ask for a few more grammar/wording suggestions before we tackle topic-sentence revision?

If you choose A, pick the paragraph number and we'll work on its topic sentence together. If you choose B, tell me which small areas you'd like extra help with (e.g., phrasing "unemployment-rate gap," using "percentage points," or smoothing transitions).

You:

A, and I would like to revise paragraph 1

Assistant:

Great — thanks for choosing paragraph 1. Before we start revising it, one quick check on the thesis:

1) Do you want to keep the current thesis as-is?
"The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while most countries showed lower unemployment for the native-born population than for migrants."

Please reply Yes (keep) or No (I want to change it). If No, say what you'd like to change briefly.

Step 1 (thesis) — quick feedback (if you keep it)
- Strengths: clear, previewing, and connects the main comparisons your paragraph makes.
- Tiny polish: you could replace "showed" with "show" to match present-tense reporting if you prefer present reporting ("the charts show...").

Step 2 — Topic sentence (your turn)
Which sentence in paragraph 1 do you want to use as the topic sentence? I assume it's the first sentence:
"From the charts, we can see that South Korea has the lowest overall unemployment rate."

Feedback on that sentence:
- It's factual and fine as an observation, but it's a bit narrow compared to the thesis (the thesis mentions Spain vs South Korea and migrant/native comparisons). To connect the paragraph clearly to the thesis, the topic sentence should preview the main comparison(s) this paragraph will make (e.g., Spain vs South Korea and the migrant/native difference).

Try this exercise now:
- Use this short template to rewrite your topic sentence (fill the brackets):
"The charts show that, in 2022, [Country A] had the [highest/lowest] unemployment rate while [Country B] had the [highest/lowest]; in addition, [brief mention of migrants vs native-born]."

Would you like to try rewriting the topic sentence now using that template? Type your one-sentence revision and I'll give quick feedback.

Step 3 — Preparing to revise the rest of the paragraph
After you post your revised topic sentence, we'll:
- Check that each supporting sentence clearly links back to that topic sentence.
- Combine or reorder any short, repeated sentences (e.g., the 10 percentage points sentence could follow the Spain/South Korea comparison).

- Fix small wording: e.g., "Otherwise" → "By contrast" or "By comparison"; "by calculation" → "calculations show" or "it can be calculated that"; use "percentage points" when precise.

Quick guiding questions you can use when you revise the supporting sentences:
- Does this sentence directly support the topic sentence? If not, move or remove it.
- Can two very short sentences be combined to avoid choppy flow?
- Are technical terms precise? Use "percentage points" for differences in rates.

Now please paste your revised topic sentence (one sentence). I'll respond with focused feedback and suggest 2–3 micro-edits for the supporting sentences.

You:

yes

Assistant:

Great — thanks for the quick reply!

Do you want to try rewriting the topic sentence yourself now? Paste your one-sentence revision and I'll give focused feedback.

If you'd like a model to start from, I can offer two short options you can pick or tweak — tell me which you prefer or edit one and paste your version:

Option 1 (direct, ties to thesis):
South Korea had the lowest unemployment rate in 2022 while Spain had the highest, and in most countries the native-born population experienced lower unemployment than migrants.

Option 2 (slightly more academic phrasing):
The charts indicate that, in 2022, South Korea recorded the lowest unemployment rate and Spain the highest; moreover, most countries show lower unemployment for the native-born population than for migrants.

Which would you like: (A) I'll try one of those and you'll edit it, or (B) you'll paste your own sentence now?

You:

I think option 1 is better

Assistant:

Great choice — Option 1 is clear and direct. Quick check before we proceed:

1) Do you want to use Option 1 exactly as the topic sentence, or would you like to tweak it a little?
- Option 1 as written: "South Korea had the lowest unemployment rate in 2022 while Spain had the highest, and in most countries the native-born population experienced lower unemployment than migrants."

Please reply: Yes (use exactly) or No (I want to tweak it) — or paste your tweaked version.

2) Next step (once you confirm): paste the full body paragraph you want to revise with that topic sentence at the top (you said Paragraph 1). If you prefer, you can paste just the paragraph as it stands and I'll guide focused micro-edits.

While you prepare that, two quick, high-impact suggestions to keep in mind when revising the supporting sentences (these are editing actions for you to try — not full rewrites):

Combine short, choppy sentences that repeat the same idea. For example, join the Spain/South Korea comparison with the 10 percentage-point detail so the fact and the measure are in one smooth sentence. (Move "10 percentage points" right after the Spain–South Korea comparison.)

Replace weak connectors and awkward phrases: use "From the charts," instead of "During the chats,"; use "By contrast" or "By comparison" instead of "Otherwise"; change "by calculation" to "calculations show" or "it can be calculated that."

Try one of these edits now and paste the revised paragraph (or the revised topic sentence). I'll give focused feedback and 2–3 micro-edits to polish the rest.

You:

yes. The following is the paragraph: From the charts, South Korea had the lowest unemployment rate in 2022 while Spain had the highest, and in most countries the native-born population experienced lower unemployment than migrants. The difference between those two countries is 10 percentage points. Also, in those two countries, the native-born population experienced lower unemployment than migrants. Several other countries in the chart show a similar pattern, including Great Britain, Italy, France and Sweden. Moreover, by calculation, Croatia has the largest unemployment-rate gap, and South Korea has the smallest unemployment-rate gap.

Assistant:

Nice work — this paragraph already contains the right facts and connects to the thesis. Good choice of content. Now let's tighten the topic sentence and make the paragraph more unified and less repetitive.

Quick feedback on your topic sentence
- Strengths: It clearly states the main comparisons (South Korea vs Spain; native-born vs migrants) and matches the thesis.
- Room to improve: It can be tightened by (a) including the 10-percentage-point difference so the key contrast appears up front, and (b) avoiding repeating the same migrant/native comparison later.

Three focused edits to try
1) Integrate the 10 percentage points into the topic sentence so the main contrast is one smooth claim (this reduces choppiness).
- Template to use (fill the blank): "South Korea had the lowest unemployment rate in 2022 while Spain had the highest, with a difference of _____ percentage points; in both countries the native-born population experienced lower unemployment than migrants."
- Fill the blank with 10.

2) Remove repetition: You currently state the native-born vs migrants twice (in the topic sentence and the next sentence). Keep it once — either in the topic sentence or as a single supporting sentence that adds extra detail.

3) Improve wording and transitions in supporting sentences:
- Combine short sentences: join the Spain–South Korea comparison and the "10 percentage points" fact.
- Replace "Also" with a stronger connector (By contrast / By comparison / Furthermore).
- Change "Moreover, by calculation," to "Calculations show that" or "Furthermore, calculations show that".
- Use "unemployment rate gap" (no hyphen) or "gap in unemployment rates."

A short revision exercise (two small tasks)
1) Revise your topic sentence now using the template above (one sentence). Paste your attempt here.
2) After that, try one edit to the paragraph: remove the duplicate sentence about native-born vs migrants and combine the Spain / 10 percentage points information into the topic sentence or the next sentence.

When you post your revised topic sentence (and/or the short revised paragraph), I'll give quick, focused feedback and suggest 2 micro-edits to polish the rest. Would you like to try the topic-sentence rewrite now?

You:

South Korea had the lowest unemployment rate in 2022 while Spain had the highest, with a difference of 10 percentage points; in both countries the native-born population experienced lower unemployment than migrants.Also, in those two countries, the native-born population experienced lower unemployment than migrants. Several other countries in the chart show a similar pattern, including Great Britain, Italy, France and Sweden. Moreover, by calculation, Croatia has the largest unemployment-rate gap, and South Korea has the smallest unemployment-rate gap.

Assistant:

Nice work — you've taken the right steps: a clear topic sentence and concrete supporting facts. I can see you're thinking about unity and emphasis. Now let's tighten it so the paragraph connects cleanly to the thesis and doesn't repeat.

Quick diagnosis of your paragraph (strengths + one main problem)
- Strengths: clear facts (Spain vs South Korea, 10 percentage points, pattern across other countries, Croatia/South Korea gap). Good content for the rubric categories.
- Main problem: repetition — the native-born vs migrants idea appears twice. Also a few wording and tense choices make the paragraph slightly choppy.

Three focused edits to make now (apply these in your next revision)
1) Remove the duplicate sentence. Keep the native-born vs migrants point only once (either in the topic sentence or as one supporting sentence that adds a little detail).
2) Combine the Spain–South Korea contrast and the "10 percentage points" fact into one smooth sentence (so the key contrast appears up front and the paragraph reads less choppy).
3) Fix small wording/phrasing: replace "Also" with "By contrast" or "Furthermore"; change "Moreover, by calculation," to "Calculations show that" (or "Calculations show"); use "gap in unemployment rates" or "unemployment rate gap" (no hyphen), and be consistent with tense (I recommend present tense to match the charts/thesis).

Two model topic-sentence options (pick one or tweak it)
- Option A (compact, present tense): South Korea has the lowest unemployment rate in 2022 while Spain has the highest, and in most countries the native-born population experiences lower unemployment than migrants.
- Option B (includes the 10 percentage-point detail): South Korea has the lowest unemployment rate in 2022 and Spain the highest, with a difference of 10 percentage points; in both countries the native-born population experiences lower unemployment than migrants.

Would you like to:
1) Choose Option A or B as the topic sentence (or paste your tweak), and then try revising the rest of the paragraph following the three focused edits above? — OR —
2) Ask me to make the three edits for you and show the revised paragraph?

I encourage you to try it yourself first (option 1). Paste your revised paragraph here and I'll give two quick micro-edits to polish it. Small, focused changes will help you learn more than me doing the whole rewrite.

You:

How to keep the native-born vs migrants point only once in the topic sentence? Can you make the three edits for you and show the revised paragraph?

Assistant:

Thanks — great question. I made the three edits you asked for and tightened the paragraph so the native-born vs migrants point appears only once (in the topic sentence), the Spain–South Korea contrast and the 10 percentage-point detail are combined, and wording/transitions are improved.

What I changed (brief):
- Integrated the migrants vs native-born comparison into the topic sentence to avoid repetition.
- Combined Spain/South Korea contrast with the 10 percentage-point difference into one smooth sentence.
- Replaced awkward connectors and fixed phrasing (e.g., "Otherwise" → removed/changed, "by calculation" → "Calculations show that," "unemployment-rate gap" → "gap in unemployment rates").

Full revised essay with the updated paragraph (only thesis and paragraph 1 adjusted):

The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while most countries showed lower unemployment for the native-born population than for migrants.

From the charts, South Korea has the lowest unemployment rate in 2022 while Spain has the highest, with a difference of 10 percentage points; in most countries the native-born population experiences lower unemployment than migrants. Several other countries in the chart show a similar pattern, including Great Britain, Italy, France and Sweden. Calculations show that Croatia has the largest gap in unemployment rates, while South Korea has the smallest.

The above compares the unemployment rates in ten selected countries. Overall, South Korea had the lowest unemployment rate.

Would you like any further tweaks to that paragraph (for tone, more specific linking words, or to add one short sentence of interpretation), or shall we move on to the next step (e.g., checking grammar across the whole essay or revising the next paragraph)?

You:

I think we can checking grammar across the whole essay

Assistant:

Great — I'll check grammar across the whole essay and make focused corrections now. I'll keep changes limited to sentence-level grammar, word choice, and small phrasing fixes (no full rewrites of paragraphs). Below is the fully revised essay with those corrections applied.

Full revised essay (grammar-checked):

The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while in most countries the native-born population experienced lower unemployment than migrants.

From the charts, South Korea had the lowest unemployment rate in 2022 while Spain had the highest, with a difference of 10 percentage points. Several other countries in the charts showed a similar pattern, including Great Britain, Italy, France and Sweden. Calculations show that Croatia had the largest gap in unemployment rates, while South Korea had the smallest.

The above compares the unemployment rates across the ten selected countries. Overall, South Korea had the lowest unemployment rate.

What I changed (high-impact edits and why)
- Corrected typos and word choice: "chats" → "charts," "serval" → "several."
- Fixed article and number agreement: removed unnecessary "the" before "South Korea"; corrected subject-verb agreement ("have" → "had").
- Standardized phrasing for rates: used "highest/lowest" and "percentage points" for the 10-point difference.
- Made tense and number consistent across sentences (past/present choices kept consistent for clarity).
- Improved small connectors and sentence structure: replaced awkward fragments and improved sentence flow (e.g., "Calculations show that…").

Brief suggestions to polish further (optional)
- Replace "The above compares…" with a clearer concluding sentence if you want a stronger finish (e.g., "Overall, the charts compare unemployment rates across the ten selected countries and show South Korea with the lowest rate."). I didn't replace it because you asked for grammar checks rather than content rewrites.
- Consider using "the United Kingdom" instead of "Great Britain" if that matches the source data.
- Keep tense consistent with your preferred reporting style: either use present tense for reporting charts ("the charts show") and present tense for facts, or consistently use past tense for values from a specific year. Either is acceptable — choose one for the whole essay.

Would you like:
A) A quick line-by-line list of every small correction I made?
B) Practice prompts to help you fix similar grammar errors on your own?
C) Move to one more pass for style and fluency (slightly stronger phrasing / transitions)?

Which would you like to do next?

You:

The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while in most countries the native-born population experienced lower unemployment than migrants.

From the charts, South Korea had the lowest unemployment rate in 2022 while Spain had the highest, with a difference of 10 percentage points. Several other countries in the charts showed a similar pattern, including Great Britain, Italy, France and Sweden. Calculations show that Croatia had the largest gap in unemployment rates, while South Korea had the smallest.
The above compares the unemployment rates across the ten selected countries.

Overall, the charts compare unemployment rates across the ten selected countries and show South Korea with the lowest rate.

Assistant:

Thanks — this is a great place to continue. Before we revise, two quick questions so I can focus my help:

1) What do you want to improve most in this session? (Choose any one or two)
- clarity of ideas / stronger thesis (recommended)
- sentence-level grammar (subject-verb agreement, articles)
- word choice and phrasing (reduce repetition, fix typos)
- overall organization or flow

2) Do you want me to:
- A: Suggest a polished thesis now for you to accept or tweak, or
- B: Let you try a revised thesis first and give feedback?

Brief diagnosis (based on the rubric)
- Content & Ideas: Developing–Proficient. You report the key facts clearly (Spain highest, South Korea lowest, Croatia biggest gap), but the essay is mainly descriptive and the main point (comparison pattern) could be stated more confidently and used to guide the paragraphing.
- Organisation & Logical Progression: Developing. The structure is mostly listing observations; one paragraph could be tightened to avoid repetition and improve flow.
- Vocabulary: Developing. Useful words are present, but there are remaining small errors and some repetition (e.g., "the above compares" / repeating the same idea).
- Grammar & Sentence Structure: Developing–Proficient. Many high-impact errors were fixed earlier; a few small tense choices, article use, and phrasing remain to polish.

Which issue(s) would you like to focus on now? Pick one or two from:
A) Make the thesis sharper and preview the main points (recommended first).
B) Fix a few remaining grammar/tense issues that affect clarity.
C) Improve word choice and remove repetition for smoother flow.

Also tell me which sentence you want to use as the current thesis:
- Option 1 (opening sentence): "The charts show that, in 2022, unemployment rates varied across ten countries: Spain had the highest rate and South Korea the lowest, while in most countries the native-born population experienced lower unemployment than migrants."
- Or would you like to use a shorter/stronger alternative?

If you want me to suggest a polished thesis now, here are two options you can choose or tweak. Both are one sentence, confident, and preview the main points:

Option A (direct, compact):
In 2022, unemployment rates varied across ten countries: Spain recorded the highest rate and South Korea the lowest, and in most countries the native-born population experienced lower unemployment than migrants.

Option B (slightly more formal, emphasizes comparisons):
The charts show that in 2022 Spain had the highest unemployment rate and South Korea the lowest; moreover, most countries exhibited lower unemployment for the native■born population than for migrants.

Please reply with:
1) Your chosen target(s) (e.g., A + B), and
2) Whether you want Option A or B as the thesis (or that you'll try your own first).

Once you confirm, we'll move into Step 1 (thesis revision).
