Contribution Analysis

Thank you for sharing your essay and the chat history. Here is a comprehensive summary and assessment report based on your original and revised essay, and the interaction with the AI assistant during your revision process:

FINAL ASSESSMENT REPORT

STUDENT ASSESSMENT REPORT

Course: LANG 0036 - Enhancing English through Global Citizenship
Module: AI for Revising Essays

1. Essay Writing Assessment

Original Essay Review

- **Content and Ideas:** The essay addresses the prompt by discussing automation's positive and negative effects on employment and the market. However, the ideas are often underdeveloped, vague, or disconnected.

- **Organization:** The essay has an identifiable structure (introduction, body, conclusion) but paragraphs lack smooth transitions and internal coherence. Some sentences are repetitive or misplaced.

- **Vocabulary:** The essay attempts to use topic-specific terms ("automation," "AI-skills") though many misuse words (e.g., "display many jobs") and lacks precision and variety.

- **Grammar:** Frequent errors appear in verb tense, subject-verb agreement, plural forms, and sentence fragments, sometimes making meaning unclear.

Revised Essay Review

- **Content and Ideas:** The revision clarifies some points, explicitly mentioning job loss and job creation, and the need for reskilling. However, examples remain general and some repetition persists.

- **Organization:** Topic sentences are improved, but overall paragraph flow still requires refinement. Some sentences remain awkward or incomplete.

- **Vocabulary:** Slight improvements are visible, especially in terms like "technology service platform" and "AI-related jobs," but occasional errors and simplicity remain.

- **Grammar:** Basic errors have been partially corrected, but some awkward phrasing, fragments, and agreement mistakes remain.

Improvement Summary

- The essay's clarity and explicitness improved slightly (+4 points).

- Key gains include clearer topic sentences and partial correction of grammar and sentence structure.

- Missed opportunities persist: the thesis statement was not clearly rewritten, full paragraph rewrites were not done, and vocabulary and grammar improvements remained limited.

---

2. Human–AI Interaction Assessment

Chat History Insights

- The student engaged with the AI assistant by requesting help to revise the thesis, identify and correct incorrect sentences, and improve topic sentences.

- The AI provided stepwise guidance, prompting the student to revise sentences and clarify ideas independently.

- The interaction lacked deeper critical discussion; the student mostly accepted AI suggestions without challenging or justifying them.

- There were limited rounds of iterative independent rewriting initiated by the student.

Interaction Scores:

- **In-Depth Conversation**: Moderate (3/5) — Several exchanges, but limited probing or extended reasoning.

- **Critical Review of AI Suggestions**: Low (2/5) — Mostly accepting AI's corrections without critique or rationale.

- **Refining Process**: Low (2/5) — Minimal iterative attempts at rewriting; mostly AI-led corrections.

- **Total Interaction Score**: 7/15

---

3. Overall Performance Summary

Strengths

- Demonstrates awareness of essay weaknesses and seeks targeted guidance on grammar, clarity, and topic sentences.

- Utilizes AI feedback to improve phrasing and sentence clarity.

- Recognizes the importance of explaining both positive and negative impacts of automation.

Areas for Growth

- **Thesis Development:** Did not revise the thesis statement independently nor clarify the central argument fully.

- **Independent Editing:** The revision process was mostly reactive; the student did not initiate multiple rewrite cycles or major restructuring.

- **Critical Engagement:** Minimal critique of AI suggestions; explanations or preferences for choices were rare.

- **Context and Planning:** The student could provide more background or goals upfront and better plan priorities and steps in revision.

4. Recommendations for Future Development

1. **Structured Revision Practice:** Independently rewrite your thesis statement, topic sentences, and full paragraphs rather than relying on piecemeal AI corrections. Treat AI feedback as a starting point, not the final version.

2. **Active Dialogue with AI:** Ask follow-up questions and explain your choices or disagreements to develop your critical thinking and decision-making skills.

3. **Editing Skills:** Practice rewriting sentences/paragraphs on your own before consulting AI. Use AI suggestions as guidance for refinement rather than direct acceptance.

4. **Strategic Goal Setting:** Clearly state your writing goals and context at the session start for more focused assistance.

5. Instructor Notes

- The student engaged with the module goals but did not complete the full revision process outlined, notably the thesis and full body paragraph rewrite.

- Interaction with AI was helpful but passive; more proactive and strategic revision habits are needed.

- Future instruction should emphasize independent drafting and require submission of revised thesis/topic sentences/full paragraphs before further AI assistance.

- Continued support in vocabulary expansion and grammar accuracy is important to improve clarity and sophistication.

Summary:

Your work shows promising initiative in seeking feedback and willingness to improve clarity and organization. However, deeper active engagement and more independent revision will elevate your writing quality substantially. This approach, combined with strategic use of AI guidance, will build stronger writing skills and collaborative competence for academic success and beyond.

If you want, I can also help you map out a step-by-step revision plan based on this feedback or provide exemplars of strong thesis and topic sentences. Just ask!

Grading Result (Hidden from students)

not finished

STUDENT ASSESSMENT REPORT

Course: LANG 0036 - Enhancing English through Global Citizenship

Module: AI for Revising Essays

ESSAY WRITING ASSESSMENT

Original Essay Scores:

- Content and Ideas: 16/25 – The essay addresses the prompt, discussing both negative and positive effects of automation, but the arguments lack clear development and sometimes are unclear or not directly relevant.

- Organization: 16/25 – The essay has an introduction, body, and conclusion, yet the progression within paragraphs is confusing, and ideas are loosely connected.

- Vocabulary: 15/25 – There is some attempt to use topic-specific terms ("automation," "AI-skills," "customer service"), but frequent inaccuracies and limited word variety undermine clarity.

- Grammar: 14/25 – The essay contains frequent grammatical errors (verb forms, plurals, agreement), sentence structure issues, and awkward phrasing, which affect understanding.

- **Original Essay Total: 61/100**

- Content and Ideas: 17/25 – The revised draft more clearly outlines automation's effects on jobs, but some repetition and lack of detailed examples remain. Viewpoints are expressed slightly more clearly.

- Organization: 17/25 – Paragraph groupings and logical progression are somewhat improved (topic sentences clarified), though some transitions and flow issues persist.

- Vocabulary: 16/25 – Word choice is improved in some places ("technology service platform," "AI-related jobs"), but errors and limited range still occur.

- Grammar: 15/25 – Some sentences have been corrected for basic clarity and agreement, but awkward phrasing and fragment errors continue in several places.

- **Revised Essay Total: 65/100**

Essay Improvement Analysis:

- **Overall Improvement: +4 points**

- **Key Improvements Made:**

- Topic sentence in the body paragraph was clarified ("Automation is causing many traditional jobs to disappear…").

- Some sentences in the body paragraph were corrected for grammar and clarity following AI guidance.

- Ideas about job creation and requirements for new skills became slightly more explicit.

- **Missed Opportunities:**

- Thesis statement was not revised or clarified; it remains awkward and ambiguous.

- Grammar and vocabulary range were only partially improved; many errors persist.

- Body paragraph revision stopped after initial corrections—no full rewrite for coherence or depth.

HUMAN-AI INTERACTION ASSESSMENT

Chat History Analysis:

- **Total Exchanges: 11 (student responses: 6)**

- **Conversation Quality:** The conversation involves targeted guidance on diagnosis and revision steps, with the student requesting help on thesis statements, topic sentences, and specific corrections. However, the engagement is somewhat shallow, with limited back-and-forth on deeper content or strategic planning.

Interaction Scores:

- **In-Depth Conversation**: 3/5 – The student asked for clarification and corrections, and responded to guidance on topic sentences and problematic sentences. There were several exchanges, but depth of engagement (e.g., iterative question-posing, or probing reasoning) was moderate.

- **Critical Review of AI Suggestions**: 2/5 – The student generally accepted AI suggestions and requested corrections but did not consistently critique or reject AI input, nor did they provide justification for choices.

- **Refining Process**: 2/5 – There is minimal evidence of iterative revision; the student requests correction but does not consistently attempt independent revision or multiple cycles of improvement.

- **Human-AI Interaction Total: 7/15**

OVERALL PERFORMANCE SUMMARY

Strengths Demonstrated:

- Willingness to seek specific feedback on problematic sentences and topic sentences (evidence: requests for correction and improvement).

- Attempted to incorporate feedback regarding clarity, leading to some improved phrases.

- Recognized main issues (clarity of explanation, structure) and targeted those areas.

Areas for Improvement:

- Did not actively revise the thesis statement or body paragraph with sustained, independent effort—student mainly requested corrections rather than demonstrating own editing.

- Limited critical evaluation of AI suggestions—did not explain why certain changes were preferred or make choices between alternatives.

- Did not complete full structured revision steps as outlined (thesis, topic sentence, full paragraph)—key step(s) missing, indicating a need for more disciplined engagement.

AI Collaboration Skills Assessment:

- **Context Provision**: Needs Improvement – The student did not provide extended background, goals, or course context when starting the revision process.

- **Strategic Planning**: Needs Improvement – The session lacked evidence of logical planning or prioritization beyond initial requests for corrections.

- **Critical Evaluation**: Needs Improvement – The student did not critically engage with the AI's feedback, mostly requesting direct corrections rather than evaluating or refining suggestions.

- **Independent Editing**: Needs Improvement – Revision attempts were minimal, with most edits following AI prompts directly rather than originating from the student's independent reworking.

RECOMMENDATIONS FOR FUTURE DEVELOPMENT

1. Commit to a full revision process: Always independently rewrite the thesis, a topic sentence, and a full body paragraph according to the module steps, even when AI prompts for active revision.

2. Engage in critical dialogue with the AI: Ask follow-up questions about advice, choose between options, and explain your decisions to develop critical writing and collaboration skills.

3. Strengthen editing skills: Practice rewriting sentences and paragraphs on your own before seeking AI corrections. Use feedback to refine, not just accept, suggestions.

- The student did not complete all required revision steps. Thesis statement and a full body paragraph were not independently revised.

- Interaction with the AI was generally passive; more active engagement and independent writing is recommended.

- Future interventions should require students to submit drafts of revised thesis, topic sentences, and paragraphs before proceeding to additional help.

Assessment based on evidence from essays and chat history, aligned with course rubric objectives.

■■■ Student Feedback

■ **Rating:** 5/5 ■ **Comment:** Good.

Complete Conversation

Assistant:

Original:
Automation is transforming industries, potentially reducing jobs while boosting efficiency. However, whether it will cause drop in the market or another, it depends on numerous reasons.

First of all, there is no doubt that the development of Automation can display many jobs such as customer service, washer and deliver. The workers with low-skill will lose their job. This result may led to strongly disruption in the market. What's more, it can worse the number of unemployed people. However, the transformation of Automation can generate lots of jobs, like AI-survey web, personal service and soon. These career need higher digital and critical thinking skills. The people who has AI-viewpoint, tech knowledge may has more and more choices during the development of Automation. For example, many companys would like to creat their own web or app to make customers more convenient to know their business. To creat the tech service platform, the company need to hire teams with AI skills. This project can allow worker receive more salaries. Additionally, the job developed comes from AI is more interesting, it can also boost the development of city. Without routine jobs, citizens will find out different world with AI. What's more, company or government can provide some ways to practice workers. This solution will help people to recognize the use of AI. Also, however, if there is no way for workers to learn AI-skills. There will be more and more risks. For example, the just workers graduate from university or something else, the people will has the critical thinking skills to use AI-tools, the popularity of it is a few.

In conclusion, if workers can be reskilled, the transformation with Automation will boost the development of global employment prospects in the long term.

Revised:
Automation is transforming industries, potentially reducing jobs while boosting efficiency. However, whether it will cause drop in the market or

another, it depends on numerous reasons.

Automation is causing many traditional jobs to disappear, especially those requiring fewer skills. One major effect of automation is the loss of jobs in industries such as customer service and delivery. Automation is changing job opportunities by eliminating some positions and creating new ones. Low-skilled workers may lose their jobs, which could increase unemployment and cause disruption in the market.What's more, it can make the number of unemployed people worse. However, automation can also create new kinds of jobs, such as AI-related web services and personal technology support. For example, many companies would like to creat their own web or app to make customers more convenient to know their business. To create a technology service platform, companies need to hire teams with AI skills. These projects can allow workers to earn higher salaries.Additionally, AI-related jobs can be more interesting. They may also help with the development of cities. Companies and governments can offer training programs to help workers learn how to use.However, if workers cannot learn AI skills, there will be more risks. For example, only a few people—such as recent university graduates—may have the critical thinking skills needed to use AI tools.

In conclusion, if workers can be re-skilled the transformation with Automation will boost the development of global employment prospects in the long term.

Assistant:

Hi there! ■ I'm your English writing coach, here to help you strengthen your essay through clear, focused revision. Before we dive in, we'll take a moment to set some goals together.

Here's how our session will work:

Negotiate your targets — We'll start by discussing what you want to improve most in your essay.

Get a quick diagnosis — I'll give you feedback on your essay based on key writing rubrics (like thesis, organization, evidence, and language).

Choose what to focus on — You'll decide which issues you'd like to work on first.

Then we'll move through a structured, three-step revision process:

Step 1: Revise your thesis statement.

Step 2: Choose one body paragraph and refine its topic sentence.

Step 3: Revise the rest of that paragraph for clarity and coherence.

My role is to guide you with questions, feedback, and examples—but you'll always lead the revisions yourself. ■

You:

Revise thesis statement

Assistant:

Let's start with the **Preliminary Stage**:

1. Negotiate Targets

First, before we revise, I'd like to hear a bit about your personal goals for improving your writing.

Which area would you most like to focus on today?

- Clarity (making your ideas easy to understand)

- Argument strength (making your position clear and well-supported)

- Structure (organizing your essay logically)

- Grammar and language (using accurate English)

- Style (making your writing sound more natural or academic)

Please share your top priorities or let me know if there's another goal you'd like to work on!

2. Diagnostic Feedback

Now, let's look at your essay using four rubric categories:

- **Thesis & Argument:**
  Your thesis mentions automation transforming industries and its effects on jobs and the market. However, it is a little unclear and does not strongly preview your main points.

- **Organization:**
  The essay has an introduction, body, and conclusion, but some ideas are jumbled, and the connections/progression could be clearer.

- **Evidence & Development:**
  You provide some examples, such as job loss and creation due to AI, but some points need more explanation or clearer development.

- **Language Use:**
  There are several grammar errors (verb forms, plurals, word choice), and some sentences are confusing or unclear.

Strengths:
- Clear awareness of the topic and task
- Attempts to explain both positive and negative effects of automation
- Includes examples

Areas for Improvement:
- Make your thesis statement clearer and more specific
- Improve grammar and sentence structure
- Organize your paragraph for clarity and logical flow
- Strengthen connections between your points and your overall argument

3. Student Priority Selection

Based on the feedback, **which issues would you most like to focus on today?**
- Do you want to work mainly on your thesis statement and organization?
- Or would you rather work on grammar and more natural-sounding language?
- Or do you have another priority?

Please let me know! Once you confirm, we'll start Step 1: Thesis Statement Revision.

Your turn: Please tell me your top priorities and confirm which weakness you'd like to focus on first!

You:

How should I revise my section on automation transformation, its impact on employment, and the market to make it clearer?

Assistant:

Thank you for your thoughtful question! Before we revise, let's finalize your **top revision priorities** for this session:

1. Confirm Your Priority

You asked:

> How should I revise my section on automation transformation, its impact on employment, and the market to make it clearer?

This suggests your main goal is:
Clarity—making your explanation of automation's effects on jobs and the market easier to understand!

Just to be sure, is your top priority:
- [X] Clarity about automation's impact (making your ideas and examples clear for readers)
- [ ] Grammar and language (fixing errors, making sentences smoother)
- [ ] Essay structure and organization (logical flow of points)
- [ ] Argument and support (strong position with clear evidence)
- [ ] Style (academic/natural phrasing)
- [ ] Other: _____

Please confirm (or add anything) so I can guide you most effectively!

2. Diagnostic Summary (Based on Your Goal)

You're already addressing the right topic and including both positives and negatives, which is excellent.
Here's what would make your section clearer:
- A thesis that specifically states your viewpoint on automation and mentions both job loss and job creation.
- Clear, logically grouped points—maybe separating negative and positive effects.
- Sentences that are easy to follow, with examples directly supporting your main ideas.

3. Confirm Your Focus

Do you want us to focus mainly on:
- Revising your thesis to clearly preview your points about job loss and job creation?
- Making the body paragraph (where you describe automation's impact) clearer and more logical, step by step?
- Or something else?

Once you confirm—**we'll start Step 1: Thesis Statement Revision, focusing on increasing clarity about automation's effects.**

Your Turn:
Please reply and confirm that you'd like to focus on CLARITY about automation's impact (or let me know if you want to add grammar, organization, etc. as a second focus).

Once you reply, I'll guide you right into revising your thesis statement for maximum clarity!

Please help me find the incorrect sentences and correct them.

Assistant:

Absolutely! Since you have confirmed that **clarity** about automation's impact is your top priority, I will help you find sentences in your essay that are unclear or incorrect, and guide you to revise them.

Let's focus first on your main body paragraph (where you explain the impact).
I'll underline sentences that need clarity or have mistakes, and offer guidance so you can revise them.
Remember, I won't rewrite full sentences for you—I'll guide you step by step!

1. Identifying Unclear/Incorrect Sentences

Here's your main body paragraph, with suggested edits and corrections:

First of all, there is no doubt that the development of Automation can display many jobs such as customer service, washer and deliver. The workers with low-skill will lose their job. **This result may led to strongly disruption in the market.** What's more, it can worse the number of unemployed people. However, the transformation of Automation can generate lots of jobs, like AI-survey web, personal service and soon. **These career need higher digital and critical thinking skills. The people who has AI-viewpoint, tech knowledge may has more and more choices during the development of Automation.** For example, many companys would like to creat their own web or app to make customers more convenient to know their business. **To creat the tech service platform, the company need to hire teams with AI skills. This project can allow worker receive more salaries.** Additionally, the job developed comes from AI is more interesting, it can also boost the development of city. Without routine jobs, citizens will find out different world with AI. What's more, company or government can provide some ways to practice workers. **This solution will help people to recognize the use of AI. Also, however, if there is no way for workers to learn AI-skills. There will be more and more risks.** For example, the just workers graduate from university or something else, the people will has the critical thinking skills to use AI-tools, the popularity of it is a few.

The sentences that are unclear or incorrect are:

- "This result may led to strongly disruption in the market."

- "It can worse the number of unemployed people."

- "These career need higher digital and critical thinking skills. The people who has AI-viewpoint, tech knowledge may has more and more choices during the development of Automation."

- "To creat the tech service platform, the company need to hire teams with AI skills. This project can allow worker receive more salaries."

- "The job developed comes from AI is more interesting, it can also boost the development of city."

- "This solution will help people to recognize the use of AI. Also, however, if there is no way for workers to learn AI-skills. There will be more and more risks."

- "For example, the just workers graduate from university or something else, the people will has the critical thinking skills to use AI-tools, the popularity of it is a few."

2. Corrections and Guidance

Let's go through each sentence and correct it **together**.

A. Original: "This result may led to strongly disruption in the market."
Problems: Verb tense ("led" should be "lead"), adverb/adjective use ("strongly" should be "strong"), article ("a disruption").
How to fix:
Would you like to try rewriting this as:
"This result may lead to a strong disruption in the market."
Or do you prefer:
"This change may cause major disruption in the market."

Which wording sounds clearest to you? Try rewriting it!

B. Original: "It can worse the number of unemployed people."
Problems: Incorrect verb ("worse" should be "increase" or "worsen"), awkward phrasing.
Try revising:
"It can make the number of unemployed people worse."
or
"It can increase unemployment."

Want to choose one or try another way?

C. Original: "These career need higher digital and critical thinking skills. The people who has AI-viewpoint, tech knowledge may has more and more choices during the development of Automation."
Problems:
- "career" should be "careers"
- Subject-verb agreement ("need"/"have")
- Clarity about who benefits

Guided revision:
"These careers require higher digital and critical thinking skills. People with an AI mindset and technology knowledge may have more choices as automation develops."

Can you try to rewrite these two sentences in your own words for clarity?

D. Original: "To creat the tech service platform, the company need to hire teams with AI skills. This project can allow worker receive more salaries."
Problems:
- Spelling ("creat" → "create")
- Subject-verb agreement ("company need" → "companies need", "worker receive" → "workers receive")
- Clarity

Try an improved version:
"To create a technology service platform, companies need to hire teams with AI skills. These projects can allow workers to earn higher salaries."

Can you restate these two sentences more clearly?

E. Original: "The job developed comes from AI is more interesting, it can also boost the development of city."
Problems:
- Unclear subject ("job developed comes from AI"?)
- City development?
Try breaking into two sentences:
"AI-related jobs can be more interesting. They may also help with the development of cities."

How would you like to say this idea more clearly?

F. Original: "This solution will help people to recognize the use of AI. Also, however, if there is no way for workers to learn AI-skills. There will be more and more risks."
Problems:
- Mixed connectives ("also, however")
- Sentence fragments

Possible revision:
"This solution can help people learn how to use AI. However, if workers cannot learn AI skills, there will be more risks."

Would you like to rewrite this problem using these hints?

G. Original: "For example, the just workers graduate from university or something else, the people will has the critical thinking skills to use AI-tools, the popularity of it is a few."
Problems:
- Unclear meaning ("just workers graduate from university or something else")
- Grammar ("will has" → "will have", "popularity of it is a few")

Try:
"For example, only a few people—such as recent university graduates—may have the critical thinking skills needed to use AI tools."

Would you prefer to say it another way?

---

3. Your Turn

Would you like to try revising one or more of these sentences now?
Pick one sentence above, and I'll help you make it clearer!
Just reply with your rewrite or ask for more hints if you're not sure. ∎

Once you've tried revising some sentences, I'll help you review and confirm the improved versions—and then we can continue to Step 1 (Thesis Statement Revision), focusing on even clearer explanations.

Ready to start revising? Which sentence would you like to try first?

Great choice! Since you want to work on **clarity**, let's focus on your **topic sentences**, which help signal the main idea of each paragraph and should connect clearly to your thesis.

Step 2: Topic Sentence Revision

To help you find your topic sentences, I'll first identify them in your current essay.
Generally, the topic sentence is the first sentence of each body paragraph and introduces the main idea for that paragraph.

Here's how your main body paragraph starts:

First of all, there is no doubt that the development of Automation can display many jobs such as customer service, washer and deliver. The workers with low-skill will lose their job.

Topic Sentence (as written):

First of all, there is no doubt that the development of Automation can display many jobs such as customer service, washer and deliver.

Let's break this down:

- It mentions automation affecting jobs.

- "Display" is not the right word here.

- It's a bit unclear what effect you're talking about (job loss or change?).

Guided Revision

A strong topic sentence should:
- Clearly state the main point of the paragraph.
- Relate directly to your thesis (which previews that automation has both positive and negative effects on jobs and the market).

Let's try to make this topic sentence **clearer and more direct**.

Possible Improvements:

Here are some ways to clarify your topic sentence (pick one, or try writing your own):

Simple, clear:
"Automation is causing many traditional jobs to disappear, especially those requiring fewer skills."

Connecting to thesis:
"One major effect of automation is the loss of jobs in industries such as customer service and delivery."

Adding both sides:
"Automation is changing job opportunities by eliminating some positions and creating new ones."

Your Turn!

Would you like to revise your topic sentence now?

Try one of the examples above, or write a new version in your own words.
If you're not sure, tell me which example you like best—I can help you adjust it!

Once you post your revised topic sentence, I'll help you make sure it connects to your thesis and previews the paragraph's main ideas!

Ready to give it a try? Please share your revised topic sentence for your main body paragraph!

You:

Revise the rest of the essay to find out my problems and correct them

Assistant:

Absolutely—I'll help you **diagnose** specific problems in your main body paragraph and **guide you step-by-step** to clearer, more effective sentences. Let's proceed, focusing mainly on **clarity**, as you requested!

Step 3: Revising the Rest of the Chosen Paragraph

I'll work with you on each sentence that needs revision. After each guiding prompt, you can try to revise, and I'll help if you get stuck.

Here's your current body paragraph (with areas marked for clarity improvement):

Automation is causing many traditional jobs to disappear, especially those requiring fewer skills. One major effect of automation is the loss of jobs in industries such as customer service and delivery. Automation is changing job opportunities by eliminating some positions and creating new ones. The workers with low-skill will lose their job. This result may lead to strong disruption in the market. What's more, it can make the

number of unemployed people worse.However, the transformation of Automation can generate lots of jobs, like AI-survey web, personal service and soon. These careers require higher digital and critical thinking skills. People with an AI mindset and technology knowledge may have more choices as automation .For example, many companies would like to creat their own web or app to make customers more convenient to know their business. To create a technology service platform, companies need to hire teams with AI skills. These projects can allow workers to earn higher salaries.Additionally, AI-related jobs can be more interesting. They may also help with the development of cities. What's more, company or government can provide some ways to practice workers. This solution can help people learn how to use AI. However, if workers cannot learn AI skills, there will be more risks. For example, only a few people—such as recent university graduates—may have the critical thinking skills needed to use AI tools.

Let's Review Each Sentence: Guidance & Your Attempt

I'll point out sentences that are unclear or repetitive and suggest how to make them clearer.
After each guidance, please try revising the sentence yourself!

1. Current:

Automation is causing many traditional jobs to disappear, especially those requiring fewer skills.

This is clear and direct! No need to change.

2. Current:

One major effect of automation is the loss of jobs in industries such as customer service and delivery.

This is similar to sentence 1. Do you want to combine these ideas to avoid repetition?
Prompt:
Try combining the two:
"Automation is causing many traditional jobs, like customer service and delivery, to disappear, especially those that require fewer skills."

Would you like to use this, or do you prefer to keep both sentences?

3. Current:

Automation is changing job opportunities by eliminating some positions and creating new ones.

This sentence gives balance. Good! Now, let's make sure the following sentences line up with this idea.

4. Current:

The workers with low-skill will lose their job. This result may lead to strong disruption in the market. What's more, it can make the number of unemployed people worse.

Problems:
- Grammar ("The workers with low-skill" → "Low-skilled workers")
- Clarity ("lose their job" → "lose their jobs")
- Repetitive—job loss already mentioned.

Prompt:
Try:
"Low-skilled workers may lose their jobs, which could increase unemployment and cause disruption in the market."

Would you like to rewrite in your own words?

---

5. Current:

> However, the transformation of Automation can generate lots of jobs, like AI-survey web, personal service and soon.

Problems:
- Clarity ("AI-survey web, personal service and soon" is unclear)
- Grammar: "jobs, like … and soon" → "jobs, such as … and others"

Prompt:
Try:
"However, automation can also create new kinds of jobs, such as AI-related web services and personal technology support."

Would you like to make it even more clear or add examples that you know?

---

6. Current:

> These careers require higher digital and critical thinking skills. People with an AI mindset and technology knowledge may have more choices as automation.

Problems:
- Grammar ("automation." → "automation develops.")
- Slightly repetitive

Prompt:
Try:
"These new jobs often require advanced digital and critical thinking skills. As automation grows, people with technology knowledge and an AI mindset may have more opportunities."

Would you like to revise, or is this clear for you?

---

7. Current:

> For example, many companies would like to creat their own web or app to make customers more convenient to know their business. To create a technology service platform, companies need to hire teams with AI skills. These projects can allow workers to earn higher salaries.

Problems:
- Clarity ("make customers more convenient to know their business" is confusing)
- Grammar ("creat" → "create")

Prompt:
Try:
"For example, companies may want to develop their own websites or apps to make it easier for customers to access information about their services. This requires hiring teams with AI skills. In turn, these projects can offer higher salaries to skilled workers."

Want to give it a try? Please rewrite in your own words!

---

8. Current:

Additionally, AI-related jobs can be more interesting. They may also help with the development of cities.

Short and clear, but you could expand if you want to explain how **they help cities.**

Prompt:
Can you give an example of how AI jobs help cities develop?
For example: "AI jobs may attract talented people and help cities grow technologically."

---

9. Current:

What's more, company or government can provide some ways to practice workers. This solution can help people learn how to use AI.

Problems:
- "practice workers" may mean "train workers"
- Clarity needed

Prompt:
Try:
"Companies and governments can offer training programs to help workers learn how to use AI tools."

Would you like to rewrite as above—or add more details?

---

10. Current:

However, if workers cannot learn AI skills, there will be more risks. For example, only a few people—such as recent university graduates—may have the critical thinking skills needed to use AI tools.

Good points! You might add:
"What are the risks?"
Can you explain what might happen if most workers cannot gain new skills?

Now—Your Turn!

Let's practice:

Pick **at least two sentences** above that you find unclear or awkward, and rewrite them for maximum clarity.

Just post your revised versions here, and I'll check them and suggest further improvements if needed!

After your revision attempts, I'll update your essay with the new sentences and show you the fully improved paragraph.

Ready to begin? Please rewrite two (or more) sentences from above, and I'll help you review and correct them! ■
